Firefly DE551

Wireless Veterinary Video Otoscope

WIRELESS

With a dedicated wireless link and a 3 hour Lithium battery, DE551 provides complete flexibility and unprecedented precision in observing the ear canal and capturing high precision images / videos.

150x MAGNIFICATION

Provides up to 50x native optical magnification and up to 150x digital magnification

MULTI-LAYER GLASS LENSES

Equipped with multi-layer glass lenses rather than plastic alternatives, thus delivering superb focal depth and crystal clear image quality.

ULTRA-BRIGHT LEDs

Highest quality ultra-bright LEDs are deployed with variable brightness control

- **Performs highly accurate and clear otoscopy observations**
- **Wirelessly captures snapshots & videos**
- **Integrates easily with Electronic Medical Records (EMR) systems**
- **Magnifies objects up to 50x (optical) and up to 150x (digital)**

Firefly DE551 is the industry's first Wireless high precision digital video otoscope with image and video capture capabilities. It provides unprecedented accuracy in observing the ear canal. This is a powerful tool which can be used for medical training, telemedicine, EMR (Electronic Medical Records) as well as for patient education. Unlike older electronic otoscopes, DE551 delivers these breakthrough capabilities - and much more - at a highly economical cost.

DE551

Technical Details

Magnification	Native Optical: 15x – 50x Digital: 15x – 150x
Sensor Resolution	720 x 480
Lens Assembly	Dual Lenses 3-Layer Glass, 650nm cutoff
Video	Format: YUY2, MJPG Frame rate: 30 FPS
Video/Image Properties	Color: Hue, Saturation Exposure: Brightness, Contrast Image: Sharpness, Gamma
Image / Video Files	BMP / AVI
Battery	Built-in 800mAH
Illumination	4 Ultra-Bright LEDs Fully adjustable brightness
Wireless Link	4 Switchable Channels
Dimensions	13cm x 3.6cm x 4cm
Accessories	AC Battery Charger 3/4/5/7mm specula included
Interface	USB 2.0
Software	Scalable Window, Zoom, Freeze, Resolution, Rotate, Flip Region of Interest (ROI) Real time measurements Automatic/Manual white balance
Operating Systems	Windows 7, Vista and XP
Warranty	1 Year Limited Hardware Warranty

INCLUDES WIRELESS RECEIVER

ADVANCED IMAGING TECHNOLOGY

Managing incoming light is a tremendous challenge in microscope design.

Reflections and lighting leaks can easily pollute the sensor, resulting in overexposure and washed-out images. Firefly effectively reduces overexposure by employing a proprietary lens assembly design and highly efficient image processing algorithms.

This highly efficient overexposure management technology enables Firefly to use ultra-bright LEDs to their fullest effect. Objects under observation are brightly illuminated without undesirable side effects.

Sophisticated image processing algorithms are ineffective without strong depth perception and a clear image. Firefly DE551 is equipped with multi-layer glass lenses rather than plastic alternatives, thus delivering superb focal depth and crystal clear images.

SOPHISTICATED SOFTWARE

DE551 is controlled directly with the FireflyPro professional image processing software which is bundled with the product. This state-of-the-art software enables users to capture, store, recall, view, manipulate and measure images and videos in real time. Its intuitive interface empowers users to get right to work anytime and anywhere.

Optional XL Specula Set

This optional set includes six metal specula of various lengths including one with a working channel.
