ServicePoint 3 6 5 ™

PROJECT TEAM
COLLABORATION AND CONTENT MANAGEMENT

ServicePoint365 is a template application for SharePoint (Office 365 SharePoint or SharePoint On-Premises) designed to improve the collaboration and content management capabilities of project and client teams. ServicePoint365 creates a robust environment organizations can subscribe to and begin using with minimal configuration or SharePoint skills. The solution consists of a *number of "Centers" that are preconfigured to help companies better organize, collaborate and manage their client-, project-, proposal- and resource-related information. Customers simply apply ServicePoint365 to their SharePoint environment and immediately start managing and collaborating on critical information in a secure, stable and easy-to-use environment.*

BENEFITS

PROJECT DOCUMENT MANAGEMENT

Cloud-based central repository to control and manage project documents and other content from start to finish. Share important information with others while ensuring the latest versions are always at hand.

PROJECT COLLABORATION

Advanced set of messaging, voice and collaboration tools that facilitate teams working together on projects, documents, tasks, activities, training and much more.

ANYWHERE, ANYTIME, ANY DEVICE

Access company, client and project information from any location across a wide variety of desktop, laptop, tablet or mobile devices.

SPEED TO VALUE

Pre-configured solution to get you up and running fast! Simply log in and begin loading your key client and project information.

WHY SERVICEPOINT365?

ServicePoint365 provides a powerful environment for project-centric services operations to collaborate on and manage critical project information. With business documents and information managed in one place, everyone has access to the latest version. Enhanced meta-data and search features help users quickly locate information and people across the company while security features let you control who can read, edit and access individual documents.

> " ServicePoint365 helps professional services operations better organize, collaborate and manage their client-, project- and resource-related information, while improving the overall end-user experience. "

Brian Newsome, Executive Vice-President at Albion Scaccia

ServicePoint365's intuitive user interface organizes content into a structure that takes the guesswork out of where information is created and stored. Internal and external users can securely access the documents they need from anywhere and any device.
