

**MT4 Web and Mobile Trader with optional VPS Capabilities is publicly released by Kenmore Design on Jan 1, 2014.**

Kenmore Design, a leader in Forex web development and software, announces the rollout of their new web and mobile trader as well as MT4 VPS service.

Kenmore Design is known for the Traders Room, the Forex client cabinet or web-based backoffice for Forex brokers.

The MT4 web trader comes built into the new edition of Kenmore Design's popular Traders Room solution, and expands the Forex web design company's existing offerings by providing an online trading experience on web and mobile devices.

"The experience is achieved by streaming the virtual environment to the browser, enabling all the functions of a standard desktop version of MT4 Trader. We call it Traders Room MT4 Cloud," said leading product manager Caleb Hayashida.

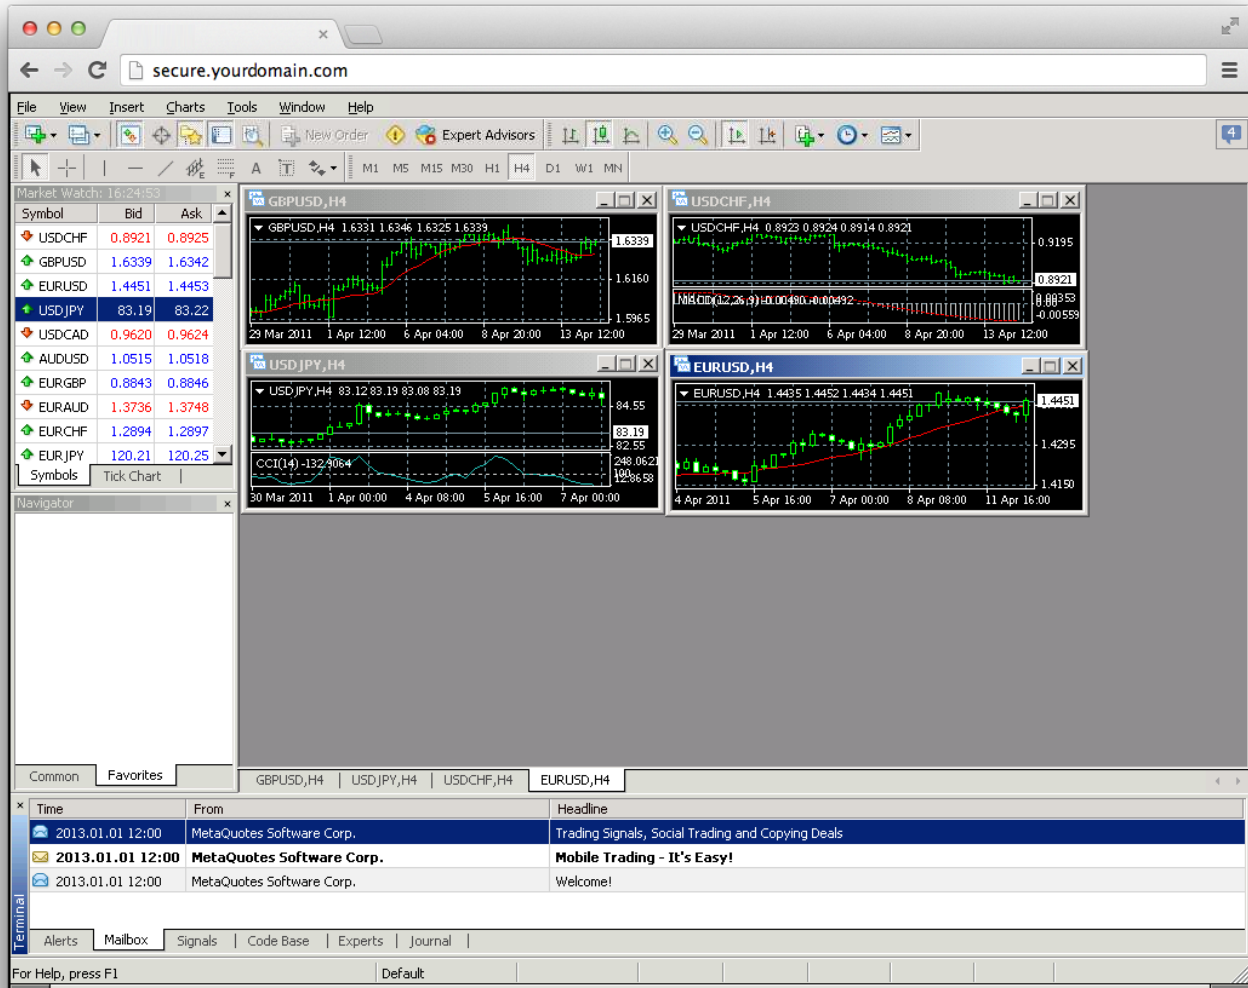

The service is completely web-based and accessible from all modern browsers, including mobile devices, and users may choose to connect using any VNC client for a better mobile experience.

"The new offering does not stop at the web and mobile trader. With an additional expansion, MT4 Cloud Edition of Traders Room can provide fully featured VPS service for traders," said Bob Sholokhov, the leading Traders Room software developer.

"We are excited to greet the new year with a new edition of our Traders Room," said CEO Alex Sherbakov. He adds that Boston-based Kenmore Design is offering the new Traders Room MT4 Cloud for the same monthly service cost as the Traders Room - Legacy edition.

The service becomes available on January 1<sup>st</sup>, 2014. For more information visit: <https://www.kenmoredesign.com>
