

Amazing! NOK OUT® on duty!!

T: Mona, how long have you been using NOK OUT®?

Mona: Since we first opened in June of 2011.

T: Since using NOK OUT®, have you received any negative comments from either co-workers or the public?

Mona: No, not a single complaint. In fact, the state inspector (who inspects our center every year) commented on how clean the cats appeared. With so many cats in one place he expected the cats to look dirty and mangy. People coming in to our center have commented on how clean and nice smelling our place is.

T: Where and how do you use NOK OUT®?

Mona: We use it all around the cat room: the cubicles, cat litter boxes and walls. The cat cubicles are cleaned and disinfected every day with NOK OUT®. We also use it to disinfect the toilets, sinks and on all non-carpeted floors. We also bathe the dogs with the NOK OUT® pet shampoo.

T: Have there been any detrimental effects on the animals since using NOK OUT®? Mona: Not at all since it is non-toxic.

“In both the bucket and the mop bucket there is NOK OUT®. As you can see we have never had an issue with the product being unfriendly to the animals :)” Jenna Minish, Center Coordinator 231-533-4070

Mona: We have a strict cleaning schedule. We also have a NOK OUT® budget. We always make sure there is enough money to purchase NOK OUT®. We wouldn't think of using anything else. People have suggested that we just use bleach to do what NOK OUT® does. After all, it is cheaper. I replied that yes, the bleach is cheaper but bleach is dangerous to use around the animals. Also, animals are very susceptible to respiratory problems. Since we have used NOK OUT® we haven't had any animals with that problem.
