Work Flow Optimized
for Multi Site,
Multi Radiologist Setup

Integrates and Works
with Any Existing PACS

Radiologist's Nirvana

Breaking out from the boundaries of Radiology Information Systems and PACS, Teleradiology Solutions developed a unique and revolutionary platform of Radiology workflow Intelligence System called RADSpa™ with an integrated image management (PACS) and Radiology information system (RIS). While the traditional Radiology systems with disparate RIS & PACS work through the mundane work-flows, RADSpa™'s Radiology Intelligence System incorporates several patent pending intelligent systems which maximize the Radiologists productivity & enhanced user experience. RADSpa™'s next generation workflow can also work with and drive your existing PACS. You can realize higher productivity gains without any major upheaval of your IT environment.

✓ Next Generation **Radiology Workflow Intelligence**.

✓ **Higher Radiologist Productivity**.

✓ Work flow Optimized for **Multi site, Multi Radiologist Setup**.
