

Water Drop Live Wallpaper for Android* Solutions Brief

Solutions Brief
Intel® Developer Zone

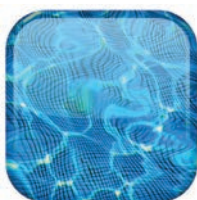

Enabled by Intel® Atom™ Tablets for Android*

Raindrops and rippling water create peaceful images with the new Water Drop Live Wallpaper by Wasabi. With this app, users can add another dimension to their home screens when water ripples or drops over their custom photos.

The Water Drop Live Wallpaper app, featured on Intel® Atom™ tablets for Android*, takes advantage of the tablet's superior high-definition screen and interactive touch capabilities. Users no longer need to choose between live wallpaper and their own custom photos. With Water Drop Live Wallpaper, they can have the best of both.

Water Drop Live Wallpaper features:

- Allows users to add the live wallpaper feature on top of customized photos on their home screens.
- Enhances customized screen savers by allowing users to add another dimension with simulated water ripples or raindrops.
- Touch-screen capabilities create an interactive experience when users add raindrops or move water ripples.

Your Home Screen Becomes an Oasis with Water Drop Live Wallpaper

The Water Drop Live Wallpaper app transforms a home screen with customized photos into a cleansing oasis. Thanks to the superior high-definition screen and interactive touch capabilities of Android* tablets, users can have live wallpaper that enhances customized photos.

Water Drop Live Wallpaper features:

Water Ripples

Watch as your tablet's high-resolution screen transforms into a cleansing pool of water.

Water Droplets

Create the serenity of a rainy day by selecting the raindrops option. Raindrops fall gently over the photo on your screen.

Stock Photo Option

Begin with a beautiful blue pool of water, and watch as the gentle ripples float across the screen.

Custom Photo Option

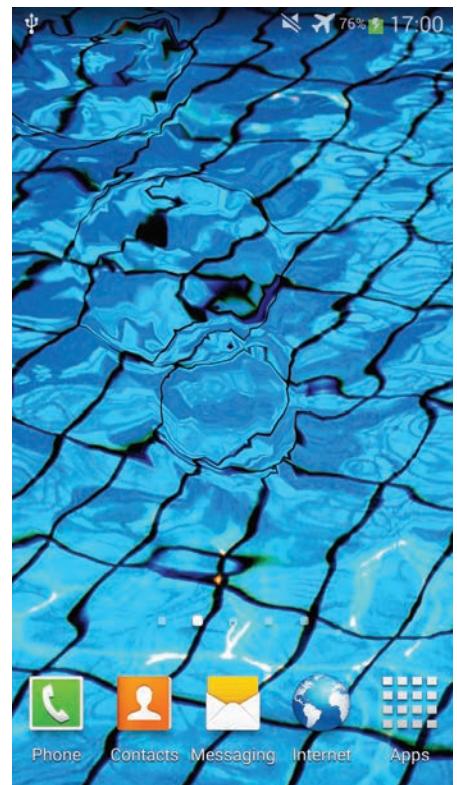

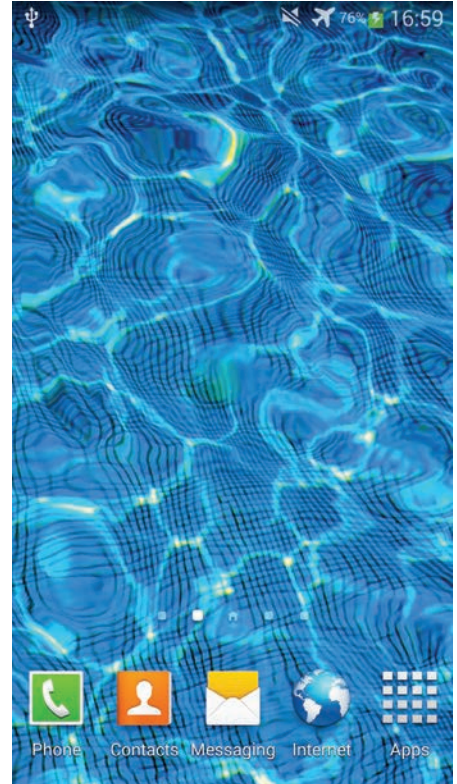

Get the best of both worlds by uploading a custom photo and then utilizing the live wallpaper capabilities on top of it. Water ripples and raindrops fall on your photo!

Interactive Touch Capabilities

Add raindrops or change the direction of water ripples with just a simple touch of the screen. The water ripples follow your finger.

Small Memory Footprint and Low Battery Consumption

Fully optimized for Android* tablets, Water Drop Live Wallpaper utilizes little memory and will not drain your device's battery.

Water Drop Live Wallpaper Powered by Intel

Home screens of the new Intel® Atom™ tablets for Android* can now become soothing pools with the new Water Drop Live Wallpaper app. The Intel® Atom processor, full HD high-resolution display and interactive touch capabilities of new Android* tablets make them perfect for showcasing this whimsical app.
