FOR IMMEDIATE RELEASE

HEALTHMART EXPRESS LAUNCHES NEW ONLINE WEBSITE

New website is launched offering an extensive variety of name brand and private label health and wellness products. The website is designed from a health care perspective, with items that can be conveniently ordered and shipped to your home or the home of your loved ones (aging parent, college student, soldier stationed remotely).

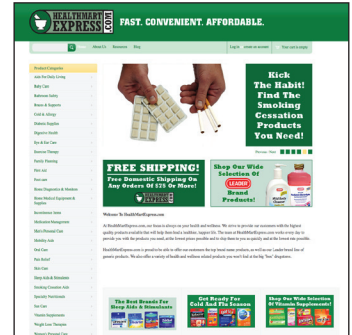

Council Bluffs, IA, December 23, 2013 – A prominent pharmacist in the Midwest has launched an expansive new website offering over-the-counter products – **HealthMartExpress.com**. The new website provides a wide variety of well known brands like Tylenol, Advil and Alka-Seltzer, in addition to an extensive selection of **private label products** that offer consumers a cost saving alternative. In addition, the website has a huge selection of vitamins, weight loss aids, braces & supports, mobility aids, and bathroom safety items, just to mention a few.

“I couldn’t be more pleased with the results of the website design and the extensive product selection we provide for a wide variety of health conditions,” Michael Ryan said. “Our customers now have a valuable resource where they can turn to get health care products at competitive prices and have those products conveniently shipped to their homes.”

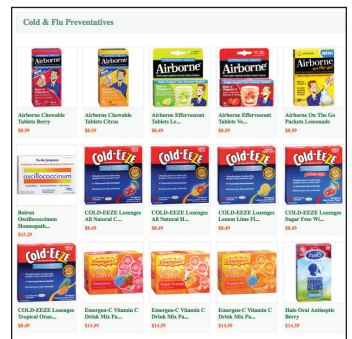

The staff at **HealthMartExpress.com** will work hard to bring their customers the newest health and wellness products available, and those **hard-to-find products** that most retail outlets are reluctant to stock. In addition, HealthMartExpress.com functions as a reliable source of health information for our customers.

For more information on **HealthMartExpress.com** or their website, contact:
