

supercritical **PROSTATE 5LX[®]**

Promotes Normal Urine Flow, Prostate Health, and Prostate Function*

Prostate health is a concern for every man, especially those over the age of 40. New Chapter's Prostate 5LX delivers an intelligently blended protocol of herbal therapeutics and supplemental nutrients to help men protect their prostate health.

Maintaining Prostate Health and Function*

Prostate 5LX delivers Green Tea, Rosemary, and Nettle Root—rich sources of phytonutrients that promote a healthy prostate inflammation response.* 5-lipoxygenase (5LX) and 12-lipoxygenase are markers of natural prostate inflammation. Prostate 5LX has been shown *in vitro* to inhibit both 5- and 12-lipoxygenase—supporting a healthy inflammation response and promoting overall prostate health.*

Prostate 5LX's targeted formula combines multiple complementary ingredients for maximum holistic benefits.

SYNERGISTIC HERBS

Saw Palmetto

The single most researched and valuable herb for nourishing the prostate is Saw Palmetto. It's been used for more than a century to support the health of the urinary tract.*

Rosemary

Rosemary and Green Tea deliver prostate health benefits and also contain anti-aging compounds.*

Green Tea

Ginger is a rich source of herbal 5LX modulators, as is Pumpkin Seed oil.

Ginger

Full-spectrum extracts of Nettle Root deliver prostate-specific phytonutrients shown to be beneficial alongside Saw Palmetto.

Nettle

Supporting Healthy Urine Flow*

With age, the prostate naturally increases in size, causing a narrowed urethra and decreased urine flow. Saw Palmetto is the most researched herb for effectively supporting these aspects of health. To help support healthy urine flow and frequency, the supercritical Saw Palmetto in Prostate 5LX works together with other targeted herbal extracts to modulate 5 alpha reductase, an enzyme linked to prostate growth.*

Comprehensive Protection

Maintaining overall prostate health may not be as obvious a concern for men as healthy urine flow, but it's also important. The whole-food complexed Selenium in Prostate 5LX helps the body combat oxidative stress, helping to protect prostate health.*

Synergy of Herbs

Studies show that the herbs in Prostate 5LX are more effective when they're used together, working in synergy. Prostate 5LX as a whole has been shown to outperform *in vitro* any single herbal ingredient. Combining herbs creates a multiplying effect to support your prostate health!

Supercritical, Pure & Potent

New Chapter uses no harsh chemical solvents to deliver a super-pure, super-potent herbal extract. Supercritical extraction preserves and concentrates the healing synergy of the whole herb using natural carbon dioxide in a low-heat, environmentally friendly process.
