

**Control. Annotate. Share. Engage.**

**Perfect for 1:1 Initiatives**

Splashtop Classroom allows teachers to share their desktop and applications. Once connected, students can view, control and annotate over lesson content directly from their mobile device. Splashtop Classroom is perfect for teachers and instructors that want to engage the entire room!

- › Teach from all four corners of the classroom
- › Turn your mobile device into an interactive whiteboard
- › Share anything. Instantly. In real time.
- › Bring the lesson to the student
- › Supports hundreds of teachers and students

**To learn more, ask your school IT to sign up for a free trial.**

[www.splashtop.com/classroom](http://www.splashtop.com/classroom)

For teachers that just want their own copy of remote desktop and whiteboard, simply download the Splashtop Whiteboard app.

**Supports Chromebooks and iPads**

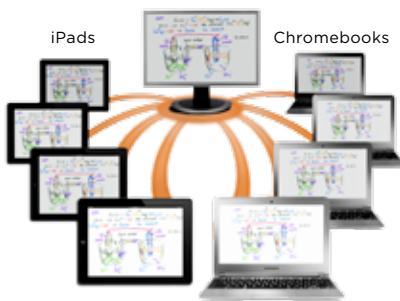

## Teach from all four corners of the classroom

Connect to the class PC/Mac from your mobile device. Get out from behind your desk and improve classroom management and student attention.

## Turn your mobile device into an interactive whiteboard

Use the toolbar to draw, highlight or write over any content. Draw over flipchart backgrounds – or include your own worksheets. Use the spotlight and screen shade tools to keep students focused.

## Share anything. Instantly. In real time.

Share ANY application – even streaming video.  
No need to reformat content for mobile devices.  
No need to upload documents ahead of time.

Keynote, PowerPoint, Websites, Word documents, FLASH Videos, Online Quizzes

## How to share your PC/Mac

**1**

Start a session using the session manager on the PC/Mac. The QR code displays on the projector.

**2**

Students snap the QR code using the Splashtop Classroom app on their mobile device.

**3**

Students can now see the teachers PC/Mac on their mobile device. They can also control then annotate over the content!

## For IT: Easily manage hundreds of teachers and students

- › Centrally purchased – no need for teachers or students to pay
- › Centrally managed – policy-based console controls who uses Splashtop and reports on usage.
- › Everything is included for teachers – remote desktop, whiteboard/annotation and PC/Mac sharing
- › Secure – installed on your servers, behind your firewall and using your Active Directory. No need to access 3rd party servers. All connections are fully encrypted.
