

LIVE HD Micro & Macro Imaging Telepathology for iPad, iPhone & Android Devices

No specimen is too big or too small for iMedHD™ and iMedHD2™ secure, live, full 1080p HD telemedicine solution for your tablet & mobile devices.

Gross specimens, autopsy, gram stains, and trans-bronchial needle aspirations can be safely and securely broadcasted LIVE for collaboration to any other location.

Remote Medical Technologies eliminates complexities of burdensome hardware and software by requiring only the compact iMedHD™ or iMedHD2™ package and Internet connectivity. These highly secure offerings, with video capture and annotation capabilities, are the ideal solutions for cost effective, real-time Internet sharing and consultations of true, live, high definition images.

Schedule an on-line demonstration TODAY and see how incorporating your iPad, iPhone, or Android devices with *Remote Medical Technologies'* features and advancements can benefit your facility.
