

DWR Express™

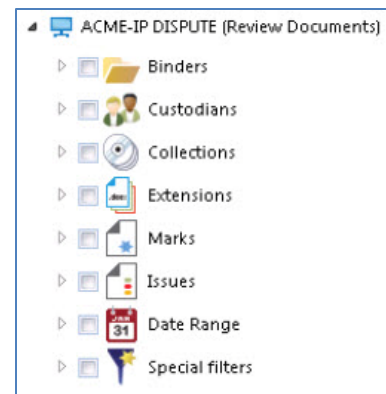

Ediscovery is no longer a complex process for only the largest cases. State and local courts are increasingly requiring that responsive documents be produced in digital form.

Many cases just have a few custodians' email to deal with, or content from a single hard drive. In internal investigations and employment matters, an in-house paralegal or internal compliance team can quickly learn the facts of the matter by running some searches on key custodian's data.

Designed for quick, simple electronic discovery, **DWR Express** is perfect for ediscovery on smaller matters, typically up to about 5 custodians. **DWR Express** ideal for small law firms, litigation support and other legal professionals, who need a quick reliable way to process, analyze and review e-mail and business documents in response to litigation, investigations, or other legal challenges.

DWR Express allows you to:

- Create a case file
- Add up to 50 GB or 100,000 documents
- Supports email, Office documents, .zip or other container files
- Search and review documents, and mark them for relevance, privilege, etc.
- Apply Bates numbers, protective order designation or other reference information
- Create productions as load files, images, or native documents

Features and Benefits

- Rapid Start: Install, process, and review documents within an hour
- 'Drag and Drop' functionality: folders and files from collected media – network files, hard drives, or external storage media – are easily selected for processing
- Over 500 file types can be processed, reviewed and produced
- View and open email messages in a viewer similar to Microsoft Outlook
- A complete de-NIST process removes application software, .exe files, and other program files that are not relevant for ediscovery; you search and review only custodian files containing potentially relevant content
- Clear, detailed exception reports identify encrypted or password protected documents
- Create a binder of documents for sharing via email, or to conduct a digital deposition
- Export Documents – includes support for Concordance, Summation, and other review formats that the opposing party might request
- Online Support System: Digital WarRoom website contains self-help guidelines, FAQs, and instructive videos to assure your success.
