Zydex Industries . . . . . 10

## Celebrating the 13th Year of the GRAA Program

On behalf of the International Road Federation (IRF) and our international panel of judges, I would like to congratulate the winners of the 2013 IRF Global Road Achievement Awards (GRAAs)! This year's winners represent some of the most forward-thinking and cutting edge organizations around the world. I invite you to examine the groundbreaking projects listed in this book and learn from their outstanding accomplishments.

Established in 2000, the IRF GRAA Program plays a significant role in IRF's mission to gather global best practices and promote technology transfer, by seeking out innovative and successful organizations and highlighting their accomplishments to share with the global transportation community. By showcasing new technologies and creative solutions, we are able to learn from each other, and build on our successes.

As we continue fulfilling IRF's mission of encouraging and promoting better, safer and more sustainable roads through the continuous exchange of knowledge and best practices, I would also encourage leading companies and organizations to submit their exemplary projects to the 2014 GRAA Competition.

Eng. Abdullah A. Al-Mogbel  
IRF Chairman

# "Better Roads. Better World."
