

**Remote Medical
Technologies**

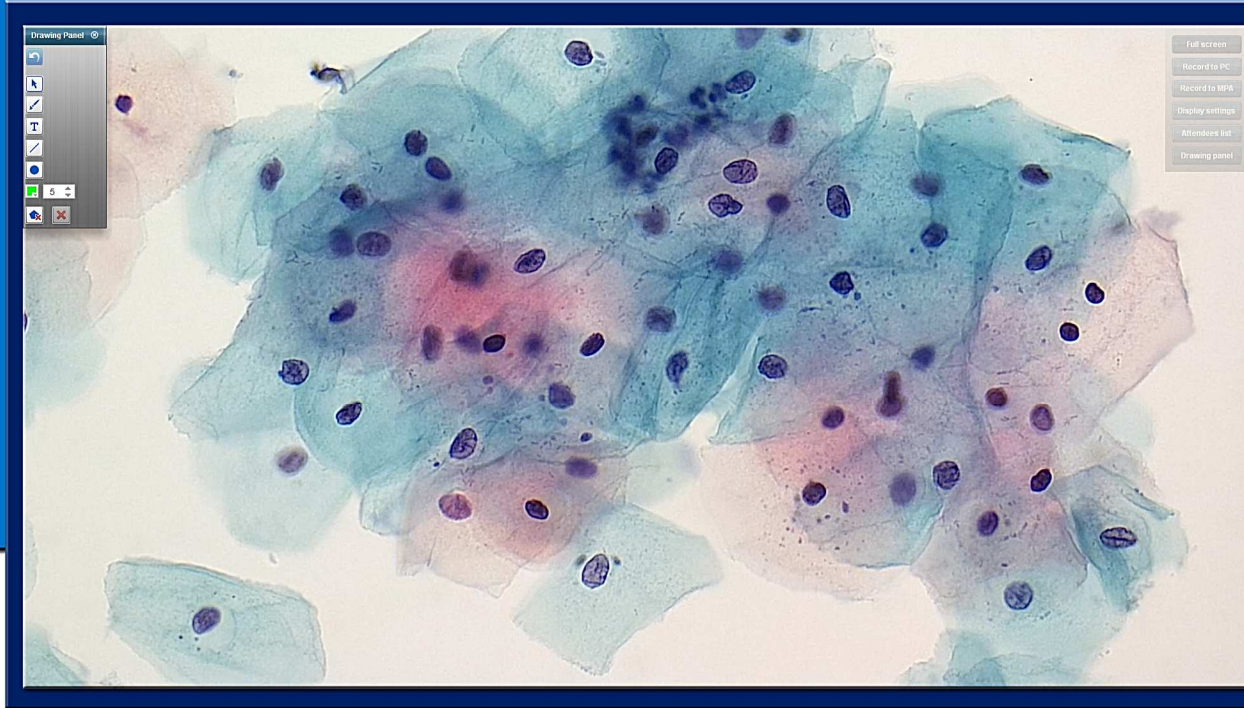

Display Mapper™

*Providing Gorgeous Imaging
...Regardless of Screen Resolution*

**Adaptive
Technology**

**Improve
Results**

**Easy
Collaboration**

No more scroll bars! 1024 x 768? 1280 x 720? Or 1920 x 1080? Regardless of your screen resolution, *Remote Medical Technologies' DisplayMapper™* feature in **iMedHD2™** delivers high definition imaging technology that allows ALL participants to view microscope and grossing images from any size monitor.

With our secure, live, real-time HD imaging solution, colleagues and participants will be able to collaborate and diagnose at full screen, no matter where you are working from. **DisplayMapper™** automatically scales and maps your monitor display allowing for full screen views and never compromising both existing and newly made annotations and notes.

To learn more about **DisplayMapper™** and see how *Remote Medical Technologies* first-in-class **iMedHD2™** Telemedicine capabilities can better your daily operations, contact us today!
