# MagicRAR Server Edition
Drive Press 4.0

Safely Triple
On-the-Fly
Server Compression

MagicRAR Drive Press 4.0 Server Edition is a **unique storage capacity increasing solution for Windows and SQL Servers**. MagicRAR Drive Press 4.0 Server Edition utilizes **on-the-fly compression** technology to increase server storage with no downtime. **MagicRAR Drive Press 4.0 Server Edition** is completely transparent for all installed applications and data, which means that neither the applications nor the data need to be migrated.

- SAFE
- FAST
- MULTI-CORE
- LOAD BALANCED

Lightning Fast — Yet Very Safe To Use
The compression is based on safe, time tested and proven NTFS compression technology. The net storage capacity increase is approximately 300% or more than the space savings which can be achieved using Windows's own built-in NTFS compression tools.

Ground Breaking Innovations
MagicRAR Drive Press 4.0 Server Edition is multi-threaded and load-balanced, achieving (de)compression throughput of 500 MB/sec or more, limited only by the performance of the underlying hardware.

► **Datacenter Bundles** — *Designed for all Windows hosting solutions*
Bundle MagicRAR Drive Press 4.0 Server Edition with your datacenter hosting solutions through aggressively discounted volume licensing.

► **Server 2003 through Server 2012 R2 x64** — *Supports all Windows Servers*
MagicRAR Drive Press 4.0 Server Edition supports all modern 32 bit and 64 bit Windows Server platforms.

► **SQL Server** — *Protects database integrity*
MagicRAR Drive Press 4.0 Server Edition is designed to be aware of data files which must remain uncompressed due to performance or stability reasons.

► **Extend Server Lifetime** — *Ideal for virtual or shared hosting solutions*
MagicRAR Drive Press 4.0 Server Edition supports virtualization platforms such as Hyper-V and VMware, extending the lifetime of servers and preventing costly migration efforts.

► **Automated Deployment** — *Unattended command line operation*
Push MagicRAR Drive Press 4.0 Server Edition to all your servers and run it from the command line programmatically to (de)compress all your servers.

MagicRAR focuses on native software compression technologies for the Microsoft Windows product family, with a special emphasis on transparent full-disk compression; pushing the capabilities of modern server hosting to their limits. Please visit www.magicrar.com today!
