Reading Trainer for Windows* 8.1
Solutions Brief

Enabled by Intel® Atom™ Tablets for Windows* 8.1

Finding the time to read the magazines, newspapers and books you enjoy can be challenging in today's busy world. Yet what if you could read more in less amount of time?

That's exactly the question HeKu IT attempted to resolve when creating its award-winning Reading Trainer app. Featured on Intel® Atom™ tablets for Windows* 8.1, Reading Trainer helps users improve reading speed and retention rate through 12 challenging and fun exercises.

Some users have doubled their reading speed and efficiency simply by practicing the exercises that help to achieve:

- Rapid recognition of numbers, letters and words
- Flexible eye movements
- Improved ability to concentrate
- Increased vision span

Read More, Learn Quicker with the Reading Trainer

Reading Trainer helps to quicken reading time by training the users through the rapid recognition of numbers, letters and words. It also teaches flexible eye movements, increased vision span and improved concentration skills.

The software recognizes a user's strengths and weaknesses through a series of tests and games that assess a user's level and records progress. The results of each training exercise are saved and can be reviewed. The more stars a person achieves, the closer he/she is to the objective of having more effective reading skills at high reading speeds.

Features of Reading Trainer include:

- Improves your reading speed, retention rate and mental capacity

- Award-winning educational software

- Highly motivational and fun gaming concepts with 12 different exercises

- Concentration training and self-evaluation

- Available in English, German, French, Italian, Spanish, Portuguese PT, Portuguese BR, Russian, Turkish and Polish

Reading Trainer is a useful app for anybody who wants to improve reading efficiency and recall, including:

Anyone who reads 30+ minutes each day – Improved reading times allows readers to speed through their reading quicker and get through long lists of books and/or magazines.

Executives – Reading documents at work can suck precious work time. Reading faster equates to greater productivity in and outside the office.

High school and college students – Students can read their stacks of required text books faster and with greater recall with Reading Trainer techniques.

Purchasing and Sales Professionals – Quickly breeze through documents and manuals for greater efficiency of time.

Reading Trainer Powered by Intel

Windows* 8.1 tablets provide a convenient and portable platform to develop faster and more efficient reading skills with Reading Trainer. The Intel® Atom™ processor, high-resolution display and interactive touch capabilities of new Windows* 8.1 tablets combine to product a powerful platform to learn new reading skills.
