Because Real Time Feedback is Critical

Activate your brand advocates and put positive word of mouth to work for your casino. Simply Share+ puts the power of real time guest feedback at your fingertips. It joins together real time feedback, online reviews and improved Google rankings all in one place.

More positive online reviews translate to a more positive online reputation for your casino. People seek out properties with 4 or 5 star reviews and quickly turn away from places with lower ratings. Positive reviews also drive your Google rankings UP.
