Impact Factor Calculation:

*Unofficial 2012 Impact Factor was established by dividing the number of times, articles published in 2010 and 2011 were cited in 2012 based on a search of the Google Scholar Citation Index database, by the number of articles published in the previous two years (2010 and 2011).

X = the number of times, articles published in 2010 and 2011, were cited by indexed journals during 2012.

Y = the total number of "citable items" published by that journal in 2010 and 2011.

2012 Impact Factor (IF) = X/Y
