

Message from the President

As President and Founder of Alliance InfoSystems (AIS), I am proud to announce that we've reached a very important milestone in our company's history –our 10th year Anniversary. This is a special time for our company as we have come a long way since our humble beginnings February 2004. Starting from the den of my house, it amazes me how AIS began with only 13 clients the first year, and has grown to 400 clients.

Over the past decade, we've witnessed significant changes within the industry and have gracefully adapted our service offerings to meet the growing demands of our customers. Some of our most noteworthy advancements include: being on two State contracts, Federal and State designations, and starting a hosting service.

While we work in a dynamic industry, you have my commitment that our customer service skills will remain exemplary. AIS will always be a company that adopts fair business practices, and places the highest priority on providing exceptional customer service. We will continue to provide personalized service through dedicated Account Executives and live, local support.

Looking ahead, we are focused on providing the same level of support and expertise that we have for the past 10 years. I am incredibly excited about this journey and truly believe the best of Alliance InfoSystems is yet to come.

Thank you for your continued dedication and loyalty.
