HIPAA ComplyPAK™ provides employees with easy access to policies, procedures, and on-demand training that specifically addresses compliance requirements for their individual job functions.

Job Function Specific Policies and Procedures

- HIPAA ComplyPAK™ provides a default library with hundreds of proven policies and procedures that are easily customizable to address individual job functions of both Covered Entities (CEs) and Business Associates (BAs)

- Existing policies and procedures can be uploaded into the HIPAA ComplyPAK™ system as desired.

- Employees can access and read applicable policies and procedures on-demand with unique login credentials.

- Employees can easily document their actions in reading specific policies and procedures that apply to them and reports of those actions can be quickly created.

On-Demand Online Training

- HIPAA ComplyPAK™ provides easy to use, on-demand, training which is updated regularly.

- Customized or existing training can be uploaded into the HIPAA ComplyPAK™ system for job functions.

- Employees can easily document training actions and on-demand reports for training can be created.

- E-certifications of training are provided to employees. .
