

Corporate Profile for HIPAA Solutions, LC

HIPAA Solutions, LC (HSLC) specializes in providing the highest quality in compliance assessments, audits and consulting; web-based legal/technical software tools such as the innovative HIPAA ComplyPAK™ that automate compliance with the Privacy and Security regulations in the Health Insurance Portability and Accountability Act (HIPAA) regulations; and training related to HIPAA and HITECH compliance.

HSLC is unique in that it has specialized in the field of HIPAA compliance since the implementation of the HIPAA Privacy rule starting in 2003 and has developed a national presence as a provider of quality compliance resources. We understand the importance of cost-effective and reliable compliance resources.

The HSLC client list includes a wide variety of organizations, ranging from healthcare providers, insurance companies, health information exchanges (HIEs), health IT technology groups, businesses, government entities, law firms, and educational institutions.

Services/products provided to clients include HIPAA/HITECH risk assessment, audits, and remediation for both privacy and security; job function specific training; and the web-based software compliance tools in the HIPAA ComplyPAK™ that provide automated, enterprise-wide solutions for monitoring and managing comprehensive compliance efforts.

A representative sample of our consultants practical work experience includes conducting privacy and security audits, assisting with strategic planning on compliance issues for business processes and technology security, providing Privacy Officer services, training on privacy and security, and assisting clients with automation of compliance activity.

HSLC's consultants have served as HIPAA "Subject Matter Experts" (SMEs) for publications such as ComputerWorld™ and the American Medical Association and have been appointed to multiple State of Texas planning committees for Health IT as HIPAA Privacy and Security SMEs.

HSLC training and education resources include automation of training provided by the HIPAA ComplyPAK™ as well as participation in seminars coordinated by organizations such as Microsoft, the American Health Information Management Association, the Virginia Hospital Association and the Texas Hospital Association.
