Technicraft Product Design Inc.

The world's leading
sprinkler shut off tool

 **Shutgun** *shuts off fire sprinklers fast!*

Water flowing from a sprinkler head can exceed 25 gallons per minute!

One sprinkler left running can cause \$1000 in losses every minute!

It pays to have one in EVERY TOOL BOX and on EVERY FLOOR!

Simply place the jaws in the opened sprinkler head, squeeze the handle once or twice and the water will stop immediately.

Shutgun works on most activated pendant, upright, conventional, semi-recessed, vertical and horizontal sidewall fire sprinkler heads.

Unique **fusible link** will release in case of fire – reactivating the sprinkler, keeping your building fully protected

\$49⁹⁵
