INSYNC BARCODE 4.0

BENEFITS

- **Ease of Use and Personalization**
- **Eliminate Paperwork**
- **Increases Inventory Accuracy**
- **ROI in 6 Months or Less**

PRODUCT INFO

Barcoding made easy for SyteLine.

Take your business to the next level with the newest release of InSync Barcode 4.0. Enjoy the totally redesigned iPhone-style user interface with our new True Touch Finger Navigation. Lose the stylus and never look back as you effortlessly flow through a simpler, cleaner user interface.

Powerful, yet simplistic in its design, the new user interface truly accommodates to both experienced and novice users of barcode data collection technology.

New admin functionality allows administrators to assign to users the exact transactions that they want them to perform. This allows for screen by screen personalization for each one of your employees.

Do more with our new Pick/Pack/Ship Workbench integration, and full featured License Plating and Container Management transactions.

Experience all this and more with our newest release of InSync Barcode.
