

Introducing... *Enviroshake*®

The Authentic Look of Slate with Lifetime Performance

***Enviroshake*® is designed to emulate natural slate, while offering maintenance free lifetime performance at ½ the cost!**

Enviroshake® is a composite roof tile made from 95% post-industrial recycled material. It is designed to authentically replicate the look of natural slate. *Enviroshake*® is the perfect solution for those who want the look of slate without the cost. *Enviroshake*®'s unique composition allows it to offer unsurpassed durability, longevity, and lifetime performance. It is mold, mildew, and insect resistant, fire, hail and wind resistant, and comes with a fully transferable Lifetime Warranty.

Enviroshake® offers significant savings compared to natural slate roofing. In fact, an *Enviroshake*® roof costs less than ½ of what natural slate costs installed! Unlike natural slate, *Enviroshake*® is lightweight so there is no need to reinforce your roof deck. Additionally, *Enviroshake*® is nailed to the roof deck, so no slate hooks are required.

Profiles

Enviroshake® is designed to be installed at a 9" reveal. Each *Enviroshake*® tile measures 20" wide x 12" tall, and comes in 2 different profiles to emulate natural slate. All ridge caps are custom made for each project.

Colours

Enviroshake® Inc. is pleased to offer various colour options to emulate a natural slate roof. *Enviroshake*® is currently available in Onyx black, Charcoal grey, Stone grey, with Sage green and Plum purple to be launched at a later date. All *Enviroshake*® Inc. products will weather, and as with natural roofing materials, there will be slight variations in shading and thickness of the shingles, giving the product a natural look on the roof.

Benefits over natural slate

- Maintenance Free, no annual repairs
- Significantly lower install cost, and lifetime cost
- Not damaged by freeze/thaw
- Will not crack, or chip
- 3X less weight than slate, so no reinforcement is required on the roof deck
- Resistant to mold, mildew, algae and insects
- Easy to install
- Thick, robust product
