

AVISOLVE PARTNERS WITH TRAPP CONNECT TO OFFER BLENDED BANDWIDTH INTERNET

IT consulting firm to market Ultra-reliable Internet to business customers

Scottsdale, AZ. – March 31, 2014 – Scottsdale-based Trapp Connect, trappconnect.com, today announced that Avisolve, avisolve.com, an expert provider of technology services, has signed Trapp Connect as their Preferred Provider for Blended Bandwidth Internet. The agreement brings together Avisolve's IT consulting expertise and Trapp Connect's affordable, ultra-reliable, BGP Internet service for business, which is to be made available to Avisolve's customers. Trapp Connect provides the advantages of improved performance and reliability through route optimization over a blend of bandwidth from multiple Tier 1 carriers.

"Trapp Connect is delighted to bring added value to the Avisolve solution portfolio," stated Cody Engilman, Vice President of Sales, Trapp Corp. "Trapp Connect's next generation, ultra-reliable Internet service is a great match for Avisolve's business customers who can't afford to have down time."

Trapp Connect leverages its carrier class network architecture, advanced data security, and a blend of top IP carriers to reduce latency and make possible a 100% uptime guarantee. Fast, reliable, and redundant service from Trapp Connect gives business customers the flexibility to withstand carrier outages or performance problems by automatically adapting to changes in the Internet.

"Trapp Connect has a highly reliable bandwidth platform that is well-received in the market," stated Scott Gossett, Vice President of Operations at Avisolve. "It's exactly what today's web-centric businesses need to offer always-on service to their customers."

The selection of Trapp Connect adds an advanced ISP to Avisolve's product offering with customizable route selection, carrier preference, and distributed denial of service (DDOS) mitigation. Through their strategic partnership, Trapp Connect gains access to Avisolve's customers while Avisolve gains new services to market to prospects and existing customers.
