

CERTIFIED ATHLETIC TRAINERS **SAVE MONEY!**

In the CLINIC:*

- The use of Certified Athletic Trainers (ATs) can increase a Physician's productivity up to **22%**.
- The use of ATs can increase revenue up to **42%**.
- For every \$1 invested in preventative care, employers gain up to a \$7 return on investment.
- ATs provide the same, or better, outcomes in clinical setting compared to Physical Therapists in orthopedic cases.

In HIGH SCHOOLS:^

- With 2 ATs on staff, 11,127 treatments were provided within one year - this is valued at **\$1,669,050** compared to the cost of similar treatments using other healthcare means.
- 3 ATs provided 13,766 treatments for student-athletes, valued at **\$2,753,300** compared to the cost of similar treatments using other healthcare means.

REDUCED Liability:‡

- From 1996-2008, **31** serious injuries or deaths occurred in student-athletes of schools without ATC coverage. The presence of ATs reduces this number greatly.

MORE Benefits:

- **Reduced student absenteeism - fast care & rehabilitation from ATs allows student-athletes to stay in school!**
- **Public Relations – hiring an AT shows that the school cares about the health and safety of students, faculty, and staff.**
- **In-house Provider to give training to coaches, faculty, staff (CPR, first aid, AED, head injury management).**
