Our accomplishments over the last decades helps bring to you the creative and innovative display solutions in customized style to suit your needs. We have spanned our network of visual solution to superlative brands in over 60 countries and our state of the art display solutions carve the trading floor of more than 19 financial markets around the globe.

Wavetec has always worked towards empowering markets with technology and help them to innovate. With technology we helped Ethiopian Commodity Exchange (ECX) in achieving their goals of market information, dissemination, transparency and capacity building throughout Ethiopia. We abetted ECX by placing LED tickers in villages and rural areas to help the farmer know his value of crop which will in turn motivate them to grow the best crop and earn maximum revenues. We also provided them with Indoor Full Color Data Wall and Tri Color Indoor and Outdoor Ticker to enhance the image of ECX in the world of stocks.

Stock Game:

Apart from transforming imaginations to reality Wavetec also helps create Virtual Environments. Stock Game is a key example. Stock Game allows real simulation of the stock market and allows its participants to trade stocks virtually. It is the first online trading simulation in the region that gives you a flavor of trading in the real market.

This game has helped thousands of students in the United Arab Emirates over the past years to learn about trading stocks and making investments in financial markets. The game is an invaluable educational tool that gives the participants the unique opportunity to immerse themselves in the complexities of trading shares, and to prepare them for a possible career in the world of business.
