

Press Release

Nous Infosystems and SmartBear Software Enter Strategic Partnership

*Nous SmartBear Partnership to Establish Offshore Center of Excellence (CoE) in Bangalore
Expanding Global Reach of SmartBear's Automated Testing Tools*

BEVERLY, Mass. and BANGALORE, India – April X, 2014 – [SmartBear Software](#), the leading provider of software quality and performance management tools, and [Nous Infosystems](#), a global IT organization offering quality software solutions and services across a broad spectrum of industries and domains, have entered into a strategic partnership to establish the Nous-SmartBear Center of Excellence (CoE) in Bangalore. The CoE will enable customers to quickly adopt SmartBear tools and ensure the quality and performance of applications through [Testree](#), the independent verification and validation division of Nous Infosystems.

“SmartBear is an industry leader and the company’s [TestComplete](#) is one of the most recognized automated testing tools in the world,” said [Vimal Nair](#), Global Head – Testree Solutions, Nous Infosystems. “The collaboration with SmartBear will help us build further on our expertise in test automation services delivering unique value to our customers. We have built some great utilities that help customers migrate seamlessly from other testing tools to SmartBear tools. We are excited about this strategic relationship with SmartBear.”

Testree partners with organizations to gain competitive advantage in providing best-of-breed testing solutions. Testree specializes in technical testing services in Test Automation, Performance Testing, Mobility, SOA, Cloud and Social Media integration. Testree offers Functional Testing, Non-Functional Testing and High End Test Consulting and Advisory Services across Banking, Financial Services and Insurance (BFSI), Healthcare & Retail industry sectors.

“SmartBear customers measure the quality of their mobile, web and desktop applications against standards of both functionality and performance,” said [Richard Caplow](#), SVP of Product Commercialization at SmartBear. “Testree brings considerable expertise with testing services to ensure that organizations deploy applications with confidence. Bringing that expertise together with SmartBear’s solutions through joint investment, along with the new Nous SmartBear Center of Excellence, is an obvious combination and we’re excited about the customer value we will create together.”

SmartBear technical and engineering teams will train Nous engineers on the latest tool sets and support project delivery requirements. Nous and SmartBear plan to jointly invest in solution development addressing key customer challenges in selected industry segments.

“We are delighted to partner with SmartBear,” said [Ajith Pillai](#), CEO of Nous Infosystems. “Partner acquisitions are the key to our global growth strategy. Working with SmartBear will further increase our capabilities in QA services and increase our competitiveness in this focus area.”
