netplus™
Telecom Infrastructure Management

Do you have visibility into your entire telecom infrastructure?

Do you know the total cost of your infrastructure (measure, track, control)?

Can you manage all of your work orders, trouble tickets, and processes?

Do you want to migrate to new technologies like SIP, VoIP and UC?

How do you manage all of your mobile devices?

These are just a few of the questions and challenges facing enterprise telecommunications and IT departments today. NetPlus® Telecommunications Management System (TMS) can give businesses the edge they need by providing a holistic view of the entire telecom infrastructure while streamlining business processes through automation and lower management costs.

The key is in NetPlus' ability to manage:

- All Telecom /IT Inventory (PBXs/Switches/Phones/ Circuits, T1s, Leased Lines, DS0/DS1, etc/Devices/ Ports/Cables/Equipment/Other IT Equipment)

- All Telecom MACD, Provisioning, Billing/Invoice Processes - both internal and external

- All Telecom and IT Contracts

- All Technologies (VoIP, Unified Communications, Legacy)

Automated UC/VoIP Migration Strategy
Proven to ease the transition to unified communication and VoIP, the NetPlus VoIP and UC Transition Tool is invaluable to any organization's migration strategy. With the NetPlus VoIP Transition Tool, organizations can effectively plan their migration by building, region, and more; schedule the actual transition for off-business hours; and sit back while the tool does the work. The NetPlus

IAUG CONVERGE2014
POWERING GLOBAL COMMUNICATIONS
APRIL 27- MAY 1, 2014 | DALLAS, TX

Booth #218
Breakout Sessions

Automation The Key to Telecom Savings
Sunday, April 27, 2014
3:30pm - 4:30pm
Room: Texas 1

Automating the Migration to VoIP/UC
Wednesday, April 30, 2014
2:00pm - 3:00pm
Room: Dallas 5

VoIP Transition Tool has cut migration time in half while saving organizations millions of dollars in labor and deployment costs.

The Telecom Infrastructure Audit
Coupled with NetPlus TMS, a Telecom Infrastructure Audit can provide additional savings ranging from 5% to 15% conservatively. The audit, when implemented simultaneously with NetPlus TMS, is a powerful service that will clean up inventory, identify/submit/recover savings from vendors, and manage disputes. This service can even fund your next telecom project!

netplus™

NetPlus® TMS

NetPlus TMS has been specifically designed for enterprise-level converged networks and can be quickly deployed to provide an integrated view across legacy telecom and VoIP networks.

With its modular architecture and highly customizable design, NetPlus TMS brings a new level of usability to communications network management. Everything is interconnected through the single-image database, assuring smooth workflow and data accuracy.

Its sophisticated modules and applications elevate NetPlus TMS beyond mere telemanagement. Customers use NetPlus TMS for cost management, advanced and automated vendor invoice management and reconciliation. NetPlus TMS allows for an effortless integration and administration of the entire network and communications infrastructure.

About NetPlus®

NetPlus is a leading solutions provider for Communications Management for both commercial and government entities. We offer a suite of solutions for expense management, data validation, fault management, inventory tracking and control, provisioning, and more. Our customers include DoD, DoS, United States Air Force, Avaya, Verizon, and the Pentagon. We are a division of Ventraq Corporation.
