FleetLink Route System

FleetMind's FleetLink Route System is a web-based route management solution that adds an unprecedented new level of support and insight to dispatch operations for industrial, residential and commercial waste collection services, and for residential cart delivery and maintenance.

Together with FleetLink Mobile real-time fleet tracking and turn-by-turn driver directions, FleetLink Route System takes the guesswork out of managing routes to make sure that vehicles actually implement designated routes to minimize the distance, amount of fuel used and amount of time required to complete assignments. The result is total visibility into route progress, greater driver accountability, better customer service and vastly improved fuel efficiencies.

FleetLink Route System can be deployed as a stand-alone dispatch solution or integrated with existing back-office systems to manage routing activities. Additionally, all required data in comma-separated-value (CSV) files can be easily imported into management databases for speedy integration and use.

Features:

FleetLink Route System lets you conduct the following activities with vastly improved accuracy and efficiency:

- Maintain cart inventories
- Manage cart assignments and status
- Manage roll-off dispatch for industrial services
- Monitor all trucks and drivers required to provide the services
- Create and maintain routes that will be used to deliver services
- Import route data from a CSV file
- Generate routes based on GeoZone screens
- Create add-ons, extras, and on-demand tasks
- Assign optimized routes to trucks and drivers
- Initiate the wireless delivery of electronic route sheets to the FleetLink Mobile system
- Support normal dispatch operations such as re-assigning service stops to different trucks
- Export data to support reporting and analysis

Benefits:

FleetLink Route System delivers the following key benefits:
- Reduced fuel consumption
- Increased productivity and profitability
- Improved service delivery
- Improved vehicle utilization
- Decreased travel time
- Happier customers
