

## **iPatientCare Launches Exclusive Specialty Focused EHR for Chiropractic and Physical Therapy**

### **iPatientCare EHR Expands its Specialty Focus for Chiropractic and Physical Therapy**

iPatientCare, Inc., a pioneer in mHealth and cloud based ambulatory EHR and integrated Practice Management and Patient Portal Solutions, announced launching an exclusive specialty focused EHR for Chiropractors and Physical Therapist.

Quality healthcare depends on the availability of quality data. Poor documentation, inaccurate data, and insufficient communication can result in errors and adverse incidents. A meaningful electronic health record (EHR) improves the ability for healthcare professionals to enact evidence-based knowledge management and aids decision making for care. EHRs can have a positive impact on quality of care, patient safety, and efficiencies. As a thought leader in Healthcare IT, iPatientCare takes the process of assessing patients' response to pain assessments and scales and other forms of questionnaires such as mental health treatment very seriously.

"We believe, most Chiropractic professionals and Physical Therapist have very little support in terms of intuitive data entry features that save their time and effort for effective clinical documentation. iPatientCare's Chiropractic and Physical Therapy EHR provides image based hot spots, rating scales, and patient questionnaires which may further be customized to each individual providers", said Udayan Mandavia, President/CEO, iPatientCare, Inc.

John Bartley, MD, Chief Medical Director, iPatientCare stated, "Our Outcomes Assessment templates give a simple, succinct way to track changes over a period of time when managing patients in a clinical setting. You can easily identify the areas of little variation or stability, activity tolerance track and pain intensity on a quantitative basis. With iPatientCare Outcomes Assessment templates, it takes less than a minute per patient/month with the evidence-based Functional Assessments or Rating Scale Forms."

Adding further to this, Suhag Pandya, Head, Clinical Decision Support said, “iPatientCare Chiro/PT EHR facilitates the Image Hot Spots, a wholly customizable feature to allow the users to identify the spots, click on them and document the text on a selected spot of an image. This makes the system more user-friendly because of the point-n-tap functionality. It will help with more accurate, qualitative and quick documentation.”

### **About iPatientCare:**

iPatientCare, Inc. is a privately held medical informatics company based at Woodbridge, New Jersey. The company is known for its pioneering contribution to mHealth and Cloud based unified product suite that include Electronic Health/Medical Record and integrated Practice Management/Billing System, Patient Portal/PHR, Health Information Exchange (HIE), and mobile point-of-care solutions that serve the ambulatory, acute/sub acute, emergency and home health market segments.

iPatientCare EHR 2014 (2.0) has received 2014 Edition Ambulatory Complete EHR certification by ICSA Labs, an Office of the National Coordinator-Authorized Certification Body (ONC-ACB), in accordance with the applicable eligible professional certification criteria adopted by the Secretary of Health and Human Services (HHS).

Full certification details can be found at [ONC Certified Health IT Product List](#).

The ONC 2014 Edition criteria support both Stage 1 and 2 Meaningful Use measures required to qualify eligible providers and hospitals for funding under the American Recovery and Reinvestment Act (ARRA).

The company has won numerous awards for its EHR technology and is recognized as an innovator in the field, being a pioneer to offer an EHR technology on a handheld device, an innovative First Responder technology to the US Army for its Theatre Medical Information System, the first to offer a Cloud based EHR product. iPatientCare is recognized as one of the best EHR and Integrated PM System for small and medium sized physicians’ offices; has been awarded most number of industry Awards; and has been recognized as a preferred/MU partner by numerous Regional Extension Centers (REC), hospitals/health systems, and academies.
