- A host of additional features at no extra charge

And with Comview's managed service, you're always assured of…

- Low administration time and cost
- The highest reliability
- The most advanced technology
- Easy to access and use reporting
- Integrated platform so you can add services seamlessly over time
- Professional and knowledgeable staff always ready to help
- Responsive service and support

AOTMP®
VERSION 2.0
Efficiency First®
Certified Solution

Gain control of your wireless & save up to 30%

Wireless costs are out of control. Average usage and overall costs continue to increase with the proliferation of multiple devices (from smart phones to tablets), the increased use of data applications, as well as ever-changing rate plans. Managing the mix of employee-owned and company-owned devices further complicates matters.

Having the time and proper tools is one of your biggest challenges. Despite being a large component of overall telecom costs, many companies just don't have the time or resources to properly manage their wirelesss telecom. Frequent upgrades, personnel changes and the like, cause companies to lose control over exactly what they have, who has it, and what they are paying for. Inefficient spreadsheet-based chargeback systems can take days to generate reports.

Comview Wireless Management to the rescue

You need a wireless expense management (WEM) solution that is easy to use and manage, yet is powerful enough to transform captured information into powerful management decisions. Comview Wireless Management collects usage data from every carrier, every month and merges it into a single, consistent view. Web-based queries let you quickly look up summary and detail information by wireless number, user, department, cost and more. Exception reports pinpoint excessive roaming, long distance, international charges or overage minutes.

With a suite of modules including…

- Reporting
- Usage Management
- Business Intelligence
- Dispute Management
- Inventory Management
- BYOD Management
- Integration with MDM (Mobile Device Management)

Total Talk Wireless Management gives you the most complete solution available, day one. **Plus, new AirWatch MDM integration, with automatic synchronization and automation tools, lets you manage all users, devices and expenses from a single, cloud-based portal.**

With Comview you also get…

Direct HR and General Ledger interfaces so that company changes are updated instantly. Monthly Plan Optimization assesses how well your plans fit your usage. Contract compliance audits assure you get all credits and plans for which your company is eligible.

WIRELESS MANAGEMENT works seamlessly with all of our other **Total Talk Management** offerings, including: **Audit & Optimization, Asset Management, Procurement, Call Accounting** and **Invoice Management,** and now with the **AirWatch Enterprise Mobility Management Platform.**

Comview Wireless Management lets you quickly access everything about a mobile device in one place.
