# MC GIS Connector

Cities, utility districts, and organizations with distributed infrastructure have the unique challenge of managing assets and work geographically. Maintenance Connection's CMMS solution now provides a way to visualize and locate data though a seamless integration with Geospatial Information Systems (GIS). Take advantage of the this new MC GIS Connector intuitive interface to manage workflow, leverage your GIS, and improve the way you do your job.

Asset Specifications \ GIS Attributes

GIS Connector Highlights

♦ Sync asset information from geospatial database to MC automatically

♦ Access locations for work orders and assets instantly right from the interface.

♦ Integrate with ESRI, AutoCAD, and many standard GIS platforms easily.

♦ Display dual map options like Google/Bing maps and street views in the same screen.

♦ Receive implementation support from Maintenance Connection's GIS experts

Favorites Navigation Bar

Tool Tip when hovering over asset provides "Create a WO" option

**Manage Asset Favorites Dialogue**

Asset Module View

- ◆ Map assets via the GIS tab.

- ◆ Display street views using a drop down option.

- ◆ Search by address.

- ◆ Manage Asset Favorites to filter customized subsets of assets and create work orders, projects or procedures.

Work Order Module View

- ◆ Create work orders instantly from map view.

- ◆ Navigate to work locations directly from a work order

- ◆ Reduce the preparation time required of field technicians

- ◆ Print current map view (printouts are often printed to accompany WO)

Other Display Features

- ◆ Toggle map layers off and on via the included legend.

- ◆ Enhance displays by including background maps (ortho, cadastral, etc.)

- ◆ Measure distance between points and use various selection tools to navigate map.

Integrate the MC GIS Connector

Our experienced team is ready to learn about your organization's needs and determine how the MC GIS Connector can be a useful addition to your existing Maintenance Connection installation. Contact us today for a demonstration and let us show you how this add-on could help your organization achieve great results.

Software Licensing

The MC GIS Connector is licensed per database and based upon the number of total concurrent software user licenses purchased. It is licensed separately for "small" and "large" organizations. Contact your account manager or the MC Sales Team for a detailed quotation to add the MC GIS Connector.

MC GIS Connector *Standard* **(1-9 licenses)**

MC GIS Connector *Enterprise* **(10+ licenses)**

GIS Implementation Services

Each GIS implementation requires setup and configuration, data mapping, and training. Our GIS Experts will evaluate your current GIS configuration and help to determine what is needed to successfully install and roll out the MC GIS Connector. Implementation services may range from cleaning up data, mapping fields from GIS to MC, and training your staff on how to manage the tool going forward. Implementation services are quoted per day and per project, but typically range from 3-15 days to properly configure the MC GIS Connector.

To learn more about this add-on, email **sales@maintenanceconnection.com** or call **888-567-3434** to speak with an Enterprise Account Manager.
