Find Freedom in and from Your Business

What is The iBLeague™?

The iBLeague™ is a personalized business metrics and analytics software-as-a-service product coupled with our data services to get you up and running quickly. It is designed to help any business, regardless of size or budget, to

- Communicate performance
- Influence decisions
- Anticipate opportunities

If you're a **business owner or manager** of a company with **multiple locations**, it's likely you've collected piles of data by now. You need an easy-to-use business intelligence system to quickly see the information that matters to you, and only that information.

You can benefit from The iBLeague™ if:

- You spend a lot of time doing manual reporting in Excel
- You need more accurate and timely information so you can make important decisions more quickly
- Your point-of-sale (POS) system provides some information, but not specific or analytical enough to your company's changing needs
- You'd love to coach your multi-location team to help increase retention, operational efficiency, and profits, but your day is consumed with fighting the day-to-day fires

How does it work?

The iBLeague™ offers decision-makers the clarity and confidence they need to make decisions that will help grow their business through an online application of:

- Personalized dashboards and scorecards
- Benchmarking
- Customized metrics
- Trending and detailed reports
- Community engagement tool
- Integrated coaching capabilities

iB iBLeague™

"We're going to stay with you and help you understand your data and what it is you need. We won't abandon you with a technology that doesn't work for you."

- Tim Brands, CEO, iBusiness Solutions

Our business metrics and analytics can help any multi-location organization that is collecting more and more data every day across systems that don't talk to each other, including:

- Salon and Spa
- Restaurant
- Franchised Businesses
