Enterprise Mobility. Are You Ready?
Extend business workflows to mobile. *This Week.*

The Capriza Solution:
Design, Distribute, Run, Manage Capriza Enterprise Applications

Capriza's SaaS platform enables IT to transform any desktop workflow on an enterprise application into a beautiful, lightweight mobile view called a "Zapp". Using the Capriza Designer, companies can extend their business workflows to mobile with no coding and no APIs and instantly distribute Zapps within the secure XenMobile EMM environment in just days of getting started.

Sample Use Cases: Mobilize any workflow**.**

Time Entry: Give employees and contractors the ability to complete a timesheet through your Human Resources application from their mobile devices.

Look Up & Edit Opportunities: Allow sales professionals to access custom views of their Opportunities in your CRM and make edits to a potential deal in realtime.

Track Sales Orders: Provide your sales managers and field sales professionals with instant mobile access to all new and existing sales orders.

Approvals: Accelerate the procurement process by enabling managers and executives to approve purchase requests with just a few taps or allow managers to easily approve travel, expenses, or invoices on the go.
