

## **Free Webinar: How to Choose the Right Satellite Phone.**

Satellite phones have grown in popularity. Once the stuff of sci-fi, or used by men in black suits and ties, today, they are used by a far wider client base, ranging from businesses to non-military government, to relief agencies to remote travelers. There are also a number of networks and phones one can choose.

This proliferation of users, along with a competitive solution marketplace inevitably prompts the question: Which satellite phone is right for me?

Join GlobaFone CEO Lou Altman for a webinar that will help you answer that question and more. Through this webinar, Lou will familiarize you with the satellite phone landscape and help you sort through the various options when you need to bring satellite phones into your organization. On this webinar you will:

- Understand the strengths and vulnerabilities of different networks
- Sift through the different handsets
- Learn about the capabilities each solution brings

By guiding you through a series of questions, you will be able to determine which solution will suit you, or your organization best. We'll ask some fundamental questions and draw some conclusions that may vary from participant to participant.

After this webinar, you will have a clear understanding of which satellite phone and network is right for you and the reasons why.

This will be a very popular webinar so sign up early.

**Title:** *How to Choose the Right Satellite Phone.*

**Date:** Thursday, May 29, 2014
