

Bolt-on Biodiesel

add a biodiesel plant
to your existing operation

Complete biodiesel plants

TURN KEY SOLUTIONS

World Energy and Hydro Dynamics have designed a complete biodiesel plant that can be added to any existing ethanol facility.

- Convert your corn oil to valuable biodiesel
- Custom designs to use as much of your existing infrastructure as possible
- Biodiesel plants designed and built by a leading biodiesel producer

Industry Expertise at work for you

We have assembled a team of biodiesel All-Stars to assist you in turning your corn oil into valuable biodiesel. We offer complete, turn key solutions to help your plant achieve maximum value for your corn oil.

HIGH QUALITY BIODIESEL

ULTRA LOW MONOGLYCERIDES
ANY CAPACITY
ULTRA LOW BOUND GLYCERIN
HIGH ESTER CONTENT
FLOWRATE FLEXIBILITY

MEETING YOUR BIODIESEL PLANT NEEDS WITH PROVEN, ROBUST DESIGNS

With an elegantly simple design, our biodiesel solutions are built to perform year after year. We use established, proven, industry leading technologies to ensure quality biodiesel production for years to come. Some of our plants have been in operation for over ten years, and all are operating at industry leading quality levels.

CUTTING EDGE TECHNOLOGY

We use industry leading ShockWave Power Reactors to provide you with the best possible biodiesel, day in and day out.

ANY CAPACITY

We can easily design and install the perfect size plant to give you the reaction capacity that you need to maximize your corn oil biodiesel capabilities.

PROVEN TECHNOLOGY

Producing biodiesel since 2003
