

iPatientCare Announces a Session on Newly Introduced Features of Clinical Documentation as Part of eLearning Series Part II

iPatientCare to Conduct a Virtual User Conference on Using Enhanced Documentation Template Features of Hot-Spot Enabled Images and Auto-Scoring Forms in iPatientCare EHR

iPatientCare, Inc., a pioneer in mHealth and cloud based ambulatory EHR, Integrated Practice Management and Patient Portal Solutions, announced a Session on newly introduced features of clinical documentation as part of iPatientCare 2014 eLearning Series Part II.

Accurate clinical documentation saves time and improves workflow by automatically generating a mostly complete document using data sourced from previously created documents. Newly introduced features Hot-Spot enabled images and auto-scoring forms from iPatientCare allows users to identify the spots/forms, click on them and document the text on a selected spot of an image. This makes the system more user-friendly because of the point-n-tap functionality. It will help with more accurate, qualitative and quick documentation and enables more efficient clinical workflow and patient care.

“Providers must have high-quality tools to help improve the quality, safety and efficient delivery of patient care”, Said Sean Pandya, Head, Clinical Decision Support, iPatientCare. “This eLearning series will assist healthcare providers to ensure seamless documentation by using advanced features from iPatientCare EHR. In addition, it can assist them with meeting standards established by the U.S. Government for Meaningful Use, which governs the use of electronic health records and allows eligible providers to earn incentive payments based on specific criteria”, added Sean Pandya.

“iPatientCare’s product solutions are designed to address needs of healthcare organizations far into the future. These solutions go beyond meeting Meaningful Use Stage 2 to ensure better patient-physician interaction, coordination of care and decisions for successful clinical outcomes and enterprise success”, said Pranav Patel, General Manager, iPatientCare.

About iPatientCare:

iPatientCare, Inc. is a privately held medical informatics company based at Woodbridge, New Jersey. The company is known for its pioneering contribution to mHealth and Cloud based unified product suite that include Electronic Health/Medical Record and integrated Practice Management/Billing System, Patient Portal/PHR, Health Information Exchange (HIE), and mobile point-of-care solutions that serve the ambulatory, acute/sub acute, emergency and home health market segments.

iPatientCare EHR 2014 (2.0) has received 2014 Edition Ambulatory Complete EHR certification by ICSA Labs, an Office of the National Coordinator-Authorized Certification Body (ONC-ACB), in accordance with the applicable eligible professional certification criteria adopted by the Secretary of Health and Human Services (HHS).

Full certification details can be found at [ONC Certified Health IT Product List](#).

The ONC 2014 Edition criteria support both Stage 1 and 2 Meaningful Use measures required to qualify eligible providers and hospitals for funding under the American Recovery and Reinvestment Act (ARRA).

The company has won numerous awards for its EHR technology and is recognized as an innovator in the field, being a pioneer to offer an EHR technology on a handheld device, an innovative First Responder technology to the US Army for its Theatre Medical Information System, the first to offer a Cloud based EHR product. iPatientCare is recognized as one of the best EHR and Integrated PM System for small and medium sized physicians’ offices; has been awarded most number of industry Awards; and has been recognized as a preferred/MU partner by numerous Regional Extension Centers (REC), hospitals/health systems, and academies.
