

# LEDGERSYNC

Saves you time, saves you hassle.

By now you have received an email informing you that Ragain Financial, your accountant, has enrolled you in LedgerSync.

LedgerSync is an innovative solution used to save time by allowing you to automatically submit your bank statements to your bookkeeping without giving out your bank login credentials.

Every month your bookkeeper requires you submit your bank statements to update your company's financial statements. The time and hassle of obtaining monthly bank statements outweigh the benefit.
