

# MZR™

## Motorized Zone Register

**The affordable solution when zone dampers are not an option.**

The MZR is a low-cost, rugged, metal, motorized zone register designed to work with most forced air zone control systems. It can also be used as a stand-alone register with a wall-mounted thermostat to eliminate over-heating and over-cooling in bonus rooms, sun rooms, guest rooms and basements.

Patent Pending

### Features and Benefits:

- Low cost
- Easy to install
- Works with most forced air zone control systems
- Allows zoning to be installed in almost all applications
- Can be used in floor and ceiling applications (Polymer register available for wall applications)
- Designed to fit most register boots

**Warranty:** 5 years

**Innovative Products**

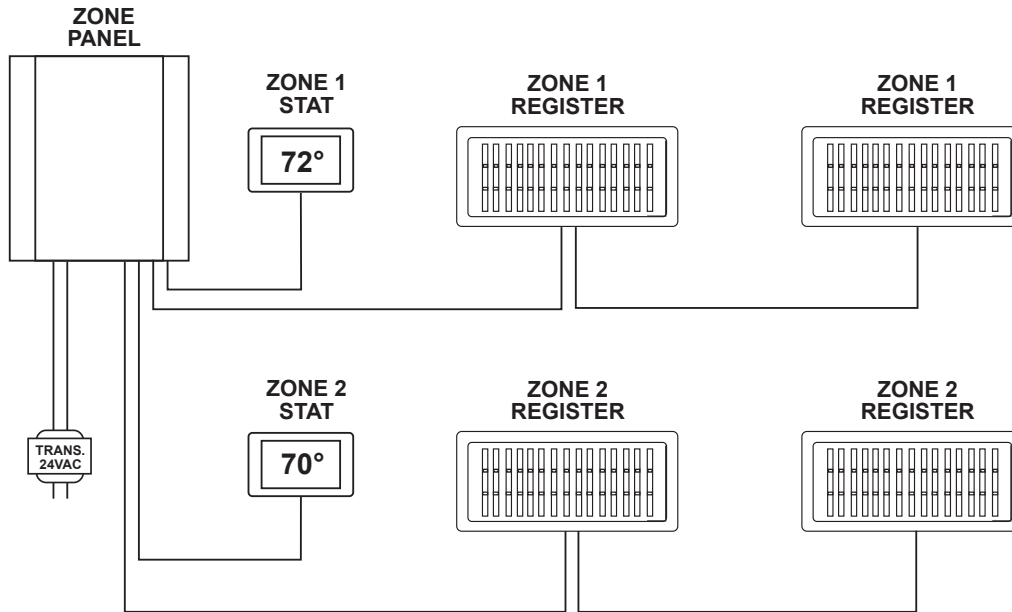

**Free Same-Day Shipping**

## MZR MOTORIZED ZONE REGISTER USED WITH ZONE CONTROL PANEL

Up to six registers may be connected to a single zone

Dimensions	Application Notes
4" x 8"	Consult factory if you need a register that will work in a 3½" stud wall.
4" x 10"	
4" x 12"	
4" x 14"	
6" x 12"	
All sizes are available in Tan and White	
May require plenum-rated wire	

### WIRING SUGGESTIONS

The most common method used to run wire inside the duct work is as follows:

1. Drill a hole in the register boot and run the wire in a conventional manner.
2. Use a fish tape to pull the wire through the duct.

### Specifications:

Operating Voltage	24VAC
Amperage	0.26A
VA Rating	6.5VA
Configuration	Spring open/power close

If wiring from actuator is run inside the duct work, plenum rated wire must be used.
