

# NightRay<sup>®</sup> 2 WIRELESS SPOTLIGHT SYSTEM

New TwinRay controller delivers safe, versatile, and dependable nighttime illumination for power linemen.

KH Industries revolutionary new NightRay 2 Spotlight is the first vehicle-mounted lighting system to offer a single remote controller to independently operate two spotlights. With the wireless TwinRay controller's exclusive A/B switch users can toggle between two NightRay Spotlights to create a wide area beam pattern or multi-directional lighting.

## Nighttime Safety

*"The NightRay Spotlight was designed specifically for the rigors of the utility industry. When it's just you and the darkness, your spotlight needs to be dependable in any situation. NightRay continuously proves itself in any environment making the power linemen our biggest advocates of the NightRay evolution."* explains Joseph Pinker, Jr., president of KH Industries.

## Versatility

The majority of our utility customers mount two NightRay's on their trucks. Over the years we've received numerous requests from our linemen to be able to operate two NightRay's independently. There are multiple benefits to this, including:

- Customize a beam pattern for the worksite with two spotlights
- Create multi-directional lighting for separate crew work areas
- Two-man line inspection

## Dependable, Clear Communication

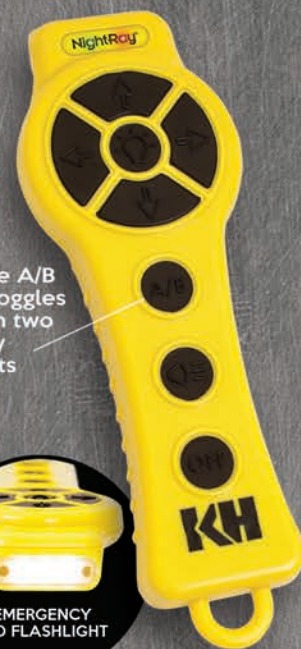

KH's exclusive Nightwave™ transmitter technology provides clear and consistent, noise free communication. The enhanced signal-to-noise ratio between the remote and receiver with KH's proprietary selective signal processing provides the technology for this state of the art NightRay 2 Spotlight System. KH's multiple R.F. code sequencing with positive identification eliminates false signals from other R.F. transmitters and environmental noise.

## Features on the NightRay 2 Spotlight System:

- New wireless TwinRay Controller will operate one or two NightRay Spotlights
- Purchase a single NightRay system and easily add a second NightRay Spotlight
- Exclusive A/B switch toggles control between two lights
- Available for dual-filament, Halogen, and HID NightRay models
- Easy Cat 5 plug & play installation on TwinRay wired joystick
- 5 Year limited warranty
