# LogicalDOC®
Document Management System

MULTI**TENANCY**

With a multi-tenant architecture, LogicalDOC is designed to virtually partition its data and configuration, and each client organization works with a customized virtual application

## AS SUPERUSER, YOU CAN CREATE AND MANAGE A SET OF TENANTS

USERS HAVE ACCESS TO THEIR TENANTS ONLY

EACH TENANT IS INDEPENDENT AND KEEPS ITS CHARACTERISTICS:
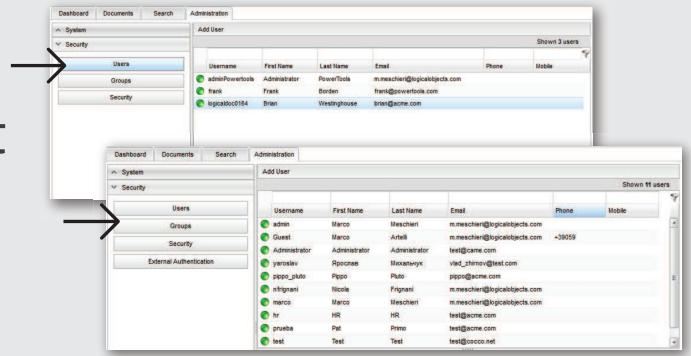

### SECURITY

DATA MODEL

LOOK & FEEL
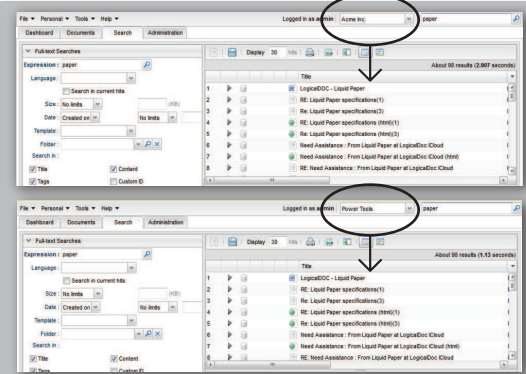

Each tenant has its own users

# As superuser, you can switch between different tenants!

Each tenant has its own documents & data structures

Different tenant = Different search results

Each tenant can be optionally branded
