

# InstaWeather by byss mobile Solutions Brief

Solutions Brief  
[Intel® Developer Zone](#)

## Enabled by Intel® Atom™ Tablets for Android\*

Developer byss mobile has enabled its interactive photo sharing app for Intel® Atom™ tablets for Android\*. This successful optimization invites a wider audience of mobile device users to personalize and share the weather at their current locations. As an Intel® Software Partner, byss mobile had access to a broad portfolio of technical and business benefits available through the Intel® Developer Zone.

The InstaWeather app gives tablets users the ability to combine personalized, location-specific, up-to-date information and share it in one, clean format. By taking inspiring photos, commenting and adding conditions, users make the story of time and place an ongoing, creative activity. InstaWeather uses a GPS tracking system that identifies current location and transmits local information like the temperature, air pressure, forecast and wind power. Users can easily share their surroundings and experiences on a variety of social media platforms. An intuitive user interface and glossy, high-resolution graphics enhance this rich new way to enjoy the weather.

## InstaWeather Personalizes Current Conditions on Android\* Tablets, Powered by Intel®

The versatility and excellent performance of Android\* tablets open up a world of new expression for travelers. Whether they are right in their hometown, or traversing an unfamiliar place, mobile device users can now share their journeys in an expansive way.

### InstaWeather Features:

#### Up-to-date Information

The app provides real time access to in-depth details about current locations and weather conditions, including: forecast, temperature, conditions, wind power and direction and air pressure.

#### Easy Photo Capturing

The user-friendly interface takes vibrant, high-resolution photos so tablet users can snap a picture, customize it and send it to friends and family who want to share in the experience.

#### Text and Editing

Captions let users comment on a photo, adding depth and immediacy to the moment. Comment on weather, create forecasts, even ask friends to help look for sunshine with an array of text and editing features.

#### Customizable “Skins”

70 different looks allow travelers to create imaginative, personalized weather reports from wherever they are. Tablet users select frames, overlays and icons to share their environments and local weather conditions.

#### Social Media Interactivity

Exchanging personal narratives through images and words is simple with this one, handy application. Travelers can recreate the atmosphere and instantly share on social media sites like Facebook\* and Twitter\*.

#### Mobile Utility

Tablets invite users to take their adventures to the next level. The crisp, vivid graphics and sensitive touch screen enhance the present moment. Once they have downloaded the InstaWeather app, mobile device users can enjoy hours of versatile portability.

## InstaWeather on Tablets for Android\*, Powered by Intel®

The latest Android\* devices equipped with efficient Intel® Atom™ processors offer dependable, powerful performance to travelers who want to document their adventures.
