

iPatientCare Partner, TransFirst, to Bring Efficiency and Automation to Patient Payment Process

iPatientCare and TransFirst Partnered to Work Together to Solve Patient Receivables with a Fully Integrated Patient Payment Process

iPatientCare, Inc., a pioneer in mHealth and cloud based ambulatory EHR, Integrated Practice Management and Patient Portal Solutions, announced its partnership with TransFirst to provide a fully-integrated patient payment solution.

The constant flow of patient payments received in the mail is critical to healthcare business. The overwhelming volume is expensive to manage and can lead to costly payment posting and billing errors. iPatientCare has teamed up with TransFirst, which serves more than 30,000 healthcare providers, to bring automation and efficiency to Provider's patient payment process. Through integrated payment processing system, office staff can process patient credit card payments and Credit Card Consent directly from iPatientCare PMS system. It reduces front-desk clutter as there is no need for a credit card terminal, office staff saves time in updating and balancing - as all payment processing is integrated into one system, and offers more payment options to patients - provides more choices which leads to more patient satisfaction and less attrition.

"The ease and convenience of the TransFirst integrated patient payment solution enables iPatientCare's healthcare providers to process payments all in one place, allowing providers to collect more patient payments, get paid faster, and reduce the time and costs needed to collect," says John Shlonsky, president and CEO of TransFirst.

"We partnered with TransFirst to work together to solve Patient Receivables with a fully integrated Patient Payment Process. Office staff can now complete credit card payment, whether swiped or key-entered, and Credit Card consent for future patient responsibility, Deductible or Co-insurance - while at the front desk within a patient's scheduled encounter or from the Payments posting window – all without leaving the iPatientCare PMS system! In seconds, payment is authorized and patient ledger as well as daily payment reports gets updated", said Vipul Patel, Senior Technology Officer, iPatientCare, Inc.

About iPatientCare:

iPatientCare, Inc. is a privately held medical informatics company based at Woodbridge, New Jersey. The company is known for its pioneering contribution to mHealth and Cloud based unified product suite that include Electronic Health/Medical Record and integrated Practice Management/Billing System, Patient Portal/PHR, Health Information Exchange (HIE), and mobile point-of-care solutions that serve the ambulatory, acute/sub acute, emergency and home health market segments.

iPatientCare EHR 2014 (2.0) has received 2014 Edition Ambulatory Complete EHR certification by ICSA Labs, an Office of the National Coordinator-Authorized Certification Body (ONC-ACB), in accordance with the applicable eligible professional certification criteria adopted by the Secretary of Health and Human Services (HHS).

Full certification details can be found at [ONC Certified Health IT Product List](#).

The ONC 2014 Edition criteria support both Stage 1 and 2 Meaningful Use measures required to qualify eligible providers and hospitals for funding under the American Recovery and Reinvestment Act (ARRA).

The company has won numerous awards for its EHR technology and is recognized as an innovator in the field, being a pioneer to offer an EHR technology on a handheld device, an innovative First Responder technology to the US Army for its Theatre Medical Information System, the first to offer a Cloud based EHR product. iPatientCare is recognized as one of the best EHR and Integrated PM System for small and medium sized physicians' offices; has been awarded most number of industry Awards; and has been recognized as a preferred/MU partner by numerous Regional Extension Centers (REC), hospitals/health systems, and academies.
