Enabled by Intel® Atom™ Tablets for Windows* 8.1

Game and app developers Exozet have made their exciting, empire-building game available for Intel® Atom™ tablets for Windows* 8.1. This new compatibility allows an expanding gaming community access to the medieval quest for power and prestige. Based on the popular board game, players lay down tiles, racing to establish and enforce their territories.

The story of power and cunning is as old as civilization itself. Set in medieval France, the game tests players' skills as they struggle to build empires and outperform rivals. Resources are power and players must calculate each move to ensure they are maximizing the riches found in the untamed land. Rivers, fields and buildings are all potent sources of wealth, and gamers must protect them at all costs. They can employ a wide variety of features designed to help them defend their newly acquired property.

As players and their civilizations progress through the ages, they will encounter unique characters with individual stories, abilities and motives. Players must ascertain if these characters will be allies or enemies, and if they will bring guidance or destruction.

The Adventure and Intrigue of Carcassonne is now on Windows* 8.1 Tablets

Portable devices are taking fantasy gaming to the next level of mobility and versatility. Carcassonne, recently optimized for Intel Atom tablets for Windows* 8.1, offers the same level of strategic challenge as the original board game, but with enhancements and features only available on a virtual platform.

Carcassonne Features:

Striking Graphics

Old world maps, tiles and stylized imagery give the game a Dark Ages atmosphere. Borrowing from the great look of the board game, the animation and intuitive interface make the game visually entrancing.

Artificially Intelligent Opponents

The crafty politics of the game achieve a level of realism with the charisma and backstory of each opponent. The characters come to life with unique skills and attributes.

Variety of Game Boards and Landscapes

Changing visuals and gameplay options mean the game is fresh and exciting with every new beginning. Players can choose to play with expansion packs like Inns and Cathedrals, Traders and Builders, Crop Circles, The Festival and The River II.

Pleasant Music and Sound Effects

A chamber music soundtrack and crisp, realistic sound effects lend the game an authentic, sensory element.

Mobility for Hours of Gameplay

The Windows* 8.1 tablets afford players hours of functionality and portability so the game can travel and the fun can continue.

Carcassonne on
Windows* 8.1 Tablets
Powered by Intel®

New Android* devices, based on Intel® Atom™ processors, provide a solid level of performance to power the medieval world found in Carcassonne.
