

Oceans Alive: Review Examining Marine Phytoplankton Supplement Released

SUMMARY: NaturesMagicGift.com releases a review of Oceans Alive, a marine phytoplankton supplement that promises to improve overall health and cognitive function.

Oceans Alive has created a huge amount of buzz recently in health and nutrition circles for its reformulated and improved marine phytoplankton formula. As a result, it has prompted an investigative review from Will DeMarco of NaturesMagicGift.com.

“It has been well known for decades that marine phytoplankton contains a wide range of health benefits,” says DeMarco. “Unfortunately,” he adds, “today’s oceans are so polluted, one can not really be sure that he or she is buying phytoplankton that does not contain toxins and pollutants. In fact, with all the toxins from man-made pollutants in the ocean today, there’s a very real chance the phytoplankton people buy that is harvested from the ocean are actually a threat to your health. That’s why when I heard about Oceans Alive and the photo-bioreactor process, which recreates the conditions and ingredients necessary for pure marine phytoplankton without any threat from pollutants, I was intrigued and wanted to do a review for my readers.”

Marine phytoplankton contains an incredible range of nutrients and minerals, including Omega-3s. Oceans Alive utilizes a “complex photo-bioreactor” which is a completely enclosed growth environment that contains the exact ingredients and conditions necessary to grow just the right strain of marine phytoplankton. In essence it is a method that ensures the user is getting all the benefits of this super-food without the potential for exposure to toxins. Just one drop of Oceans Alive contains 170 billion cells of marine phytoplankton.

“Our review explains that we were highly impressed with Oceans Alive,” says DeMarco. “Marine phytoplankton is truly the Earth’s super-food that contains enormous health benefits. Given the fact that Oceans Alive utilizes a process that eliminates the threat of toxins and pollutants, this a must have for anyone hoping to improve health and/or cognitive function.”

NaturesMagicGift.com provides unbiased reviews of natural health and beauty products, fitness supplements and other all natural lifestyle products.
