Closed Sales
The number of sales transactions which closed during the month

*Economists' note*: Closed Sales are one of the simplest—yet most important—indicators for the residential real estate market. When comparing Closed Sales across markets of different sizes, we recommend using the year-over-year percent changes rather than the absolute counts. Realtors® and their clients should also be wary of month-to-month comparisons of Closed Sales because of potential seasonal effects.

## **Cash Sales**

The number of Closed Sales during the month in which buyers exclusively paid in cash

*Economists' note* : Cash Sales can be a useful indicator of the extent to which investors are participating in the market. Why? Investors are far more likely to have the funds to purchase a home available up front, whereas the typical homebuyer requires a mortgage or some other form of financing. There are, of course, many possible exceptions, so this statistic should be interpreted with care.

Month	Cash Sales	Percent Change Year-over-Year

June 2013	1,059	-11.5%

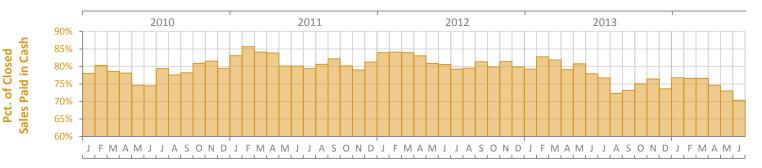

### Cash Sales as a Percentage of Closed Sales

The percentage of Closed Sales during the month which were Cash Sales

*Economists' note*: This statistic is simply another way of viewing Cash Sales. The remaining percentages of Closed Sales (i.e. those not paid fully in cash) each month involved some sort of financing, such as mortgages, owner/seller financing, assumed loans, etc.

Month	Percent of Closed Sales Paid in Cash	Percent Change Year-over-Year
June 2014	70.3%	-9.8%
May 2014	73.0%	-9.6%
April 2014	74.6%	-5.6%

November 2013	76.4%	-6.1%
October 2013	75.0%	-6.0%
September 2013	73.1%	-10.1%
August 2013	72.3%	-9.1%
July 2013	76.7%	-3.2%
June 2013	77.9%	-3.2%

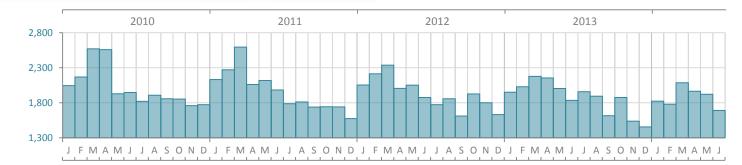

## New Pending Sales

The number of property listings that went from "Active" to "Pending" status during the month

*Economists' note* : Because of the typical length of time it takes for a sale to close, economists consider Pending Sales to be a decent indicator of potential future Closed Sales. It is important to bear in mind, however, that not all Pending Sales will be closed successfully. So, the effectiveness of Pending Sales as a future indicator of Closed Sales is susceptible to changes in market conditions such as the availability of financing for homebuyers and the inventory of distressed properties for sale.

Month	New Pending Sales	Percent Change Year-over-Year
June 2014	1,691	-7.8%
May 2014	1,922	-4.0%
April 2014	1,966	-8.8%

August 2013	1,894	2.0%
July 2013	1,959	10.4%
June 2013	1,835	-2.2%

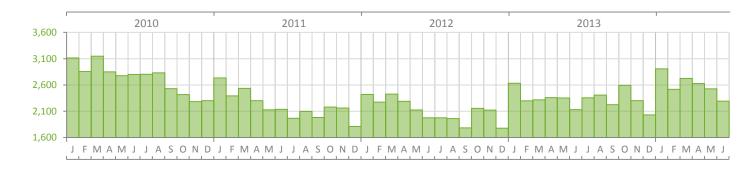

# New Listings

The number of properties put onto the market during the month

*Economists' note* : In a recovering market, we expect that new listings will eventually rise as sellers raise their estimations of value. But this increase will take place only after the market has turned up, so New Listings are a *lagging* indicator of the health of the market. Also be aware of properties which have been withdrawn from the market and then relisted. These are not really New Listings.

Month	New Listings	Percent Change Year-over-Year
June 2014	2,293	7.6%
May 2014	2,526	7.4%

## Median Sale Price

The median sale price reported for the month (i.e. 50% of sales were above and 50% of sales were below)

*Economists' note*: Median Sale Price is our preferred summary statistic for price activity because, unlike Average Sale Price, Median Sale Price is not sensitive to high sale prices for small numbers of homes that may not be characteristic of the market area.

Month	Median Sale Price	Percent Change Year-over-Year
June 2014	\$130,000	23.8%
May 2014	\$126,150	16.8%
April 2014	\$120,000	14.3%
March 2014	\$120,000	25.7%

December 2013	\$120,000	26.2%
November 2013	\$117,000	27.2%
October 2013	\$116,500	29.4%
September 2013	\$105,000	18.0%
August 2013	\$118,000	36.8%
July 2013	\$108,500	29.2%
June 2013	\$105,000	22.2%

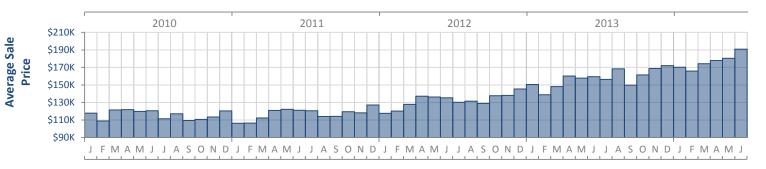

### Average Sale Price

The average sale price reported for the month (i.e. total sales in dollars divided by the number of sales)

*Economists' note* : As noted above, we prefer Median Sale Price over Average Sale Price as a summary statistic for home prices. However, Average Sale Price does have its uses—particularly when it is analyzed alongside the Median Sale Price. For one, the relative difference between the two statistics can provide some insight into the market for higher-end homes in an area.

Month	Average Sale Price	Percent Change Year-over-Year
June 2014	\$190,816	19.6%
May 2014	\$180,522	14.4%
April 2014	\$177,985	11.2%
March 2014	\$174,253	17.6%
February 2014	\$165,879	19.4%
January 2014	\$170,291	13.2%
December 2013	\$172,081	18.3%
November 2013	\$168,816	22.3%
October 2013	\$161,455	17.2%
September 2013	\$149,818	16.2%
August 2013	\$168,426	28.1%
July 2013	\$156,314	20.1%
June 2013	\$159,501	17.9%

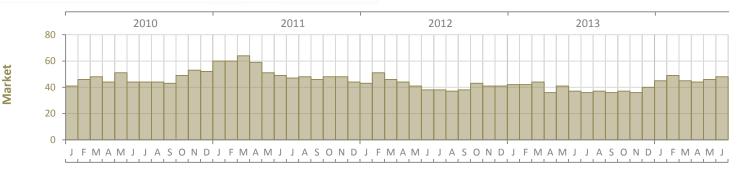

**Median Days on** 

#### Median Days on Market The median number of days that properties sold during the month were on the market

*Economists' note* : Median Days on Market is the amount of time the "middle" property selling this month was on the market. That is, 50% of homes selling this month took *less* time to sell, and 50% of homes took *more* time to sell. We use the median rather than the average because the median is not particularly sensitive to sales of homes that took an unusually large amount of time to sell relative to the vast majority of homes in the market.

Month	Median Days on	Percent Change
	Market	Year-over-Year
June 2014	48	29.7%
May 2014	46	12.2%
April 2014	44	22.2%

September 2013	36	-5.3%
August 2013	37	0.0%
July 2013	36	-5.3%
June 2013	37	-2.6%

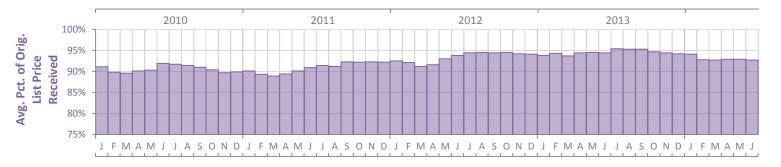

### Average Percent of Original List Price Received

The average of the sale price (as a percentage of the original list price) across all properties selling during the month

*Economists' note* : The Average Percent of Original List Price Received is an indicator of market conditions, in that in a recovering market, the measure rises as buyers realize that the market may be moving away from them and they need to match the selling price (or better it) in order to get a contract on the house. This is usually the last measure to indicate a market that has shifted from down to up, and is another *lagging* indicator.

Month	Avg. Pct. of Orig. List Price Received	Percent Change Year-over-Year
June 2014	92.7%	-1.8%
May 2014	92.9%	-1.7%
April 2014	92.9%	-1.6%

December 2013	94.2%	0.1%
November 2013	94.4%	0.2%
October 2013	94.7%	0.2%
September 2013	95.3%	1.0%

## Months Supply of Inventory An estimate of the number of months it will take to

deplete the current Inventory given recent sales rates

*Economists' note*: This is an indicator of the state of the market, whether it is a buyers' market or a sellers' market. The benchmark for a balanced market (favoring neither buyer nor seller) is 5.5 Months of Inventory. Higher numbers indicate a buyers' market, lower numbers a sellers' market.
