

Contact: Mindy Berkson, Founder
847-989-8628

Location: Headquartered in Chicago, Illinois.
Servicing clients globally.

Mission: As patient advocates our goal is to arm consumers/patients with information and education to make the best medical choices at home and from across the borders. Providing clients with targeted questions specific to their diagnosis, educating patients on differences in medical care and treatment costs when traveling internationally and identifying surrogates and egg donors to suit individual criteria; while securing a team of unbiased multi-disciplinary professionals are all essential elements to successfully overcoming infertility.

Quote from Mindy: “My personal goal is to thoroughly comprehend my client’s needs enabling me to adequately address the individual financial, physical and emotional stressors as these issues pertain to my client’s individual risk adversity. Providing uncompromising guidance and support which surpasses my clients expectations is thoroughly rewarding.”

Infertility Consulting

Our Strengths:

We are instrumental in helping our clients identify egg donors and surrogates nationwide. We are able to do this through carefully selected strategic alliances we have cultivated with egg donor and surrogate recruiting agencies. These alliances allow us to:

- Exponentially expand the pool of qualified and available candidates
- Match close to desired criteria and ethnicity in a short time frame

Pre negotiated agreements with these agencies allow us to mitigate financial risk factors that are often inherent in the donor surrogate selection process.

Patient advocacy does not end there. Being able to implement a multi disciplinary team of unbiased professionals including the fertility specialist, embryologists, attorneys, insurance agents, financial and estate planners to suit our clients individualized needs is truly what differentiates and distinguishes Lotus Blossom Consulting.

Our Typical Client:

A vast majority of our clients undergo infertility treatments due to delayed child bearing; as most women do not consider that for many fertility rates begin to decline at age 27. Thus, many of our clients are women in their mid to upper 30’s seeking to accomplish their journey to parenthood through egg donation. This involves using eggs from an egg donor ranging in age from 21 to 30 years old. Other popular treatment options may include egg freezing or surrogacy. Both egg donation and surrogacy are also popular options for our same sex male clients seeking to have biological offspring.

LOTUS BLOSSOM CONSULTING, LLC

As one of the first international infertility consultancies in the United States, Lotus Blossom Consulting, LLC was begun in 2005 by founder Mindy Berkson, after her own battle with secondary infertility. Lotus Blossom Consulting was founded to assist individuals working through the often challenging roadblocks of infertility, to help achieve their family building goals by providing the best information and resources available to them around the world – in one location.

With extensive experience in all aspects of infertility, from egg donation and surrogacy to in-vitro fertilization, Lotus Blossom works with individuals on a case by case basis, taking into consideration clients' emotional, physical and financial infertility issues. By researching the best combination of resources available, Lotus Blossom then develops an individualized, comprehensive plan, including relevant insurance information, to help clients make informed decisions. Lotus Blossom has worked with many individuals to enrich their lives by helping to fulfill their dreams of having children.
