

NEW I-SEMBLE HAIRPIN LEGS MAKE STYLISH AND STURDY TABLES

3-Rod Design Comes in Stainless Steel or Painted Black

MEDINA, MN (July 31, 2014) - Rockler Woodworking and Hardware has introduced I-Semble 3-Rod Hairpin Legs, a new style of hairpin legs designed to allow DIYers to easily build sturdy mid-century style furniture such as dining tables, desks, and sofa tables with minimal tools. The legs include mounting screws which make installation extremely simple. The I-Semble 3-Rod Hairpin Legs are 28 inches high, just the right amount for tables and desks. The 3-rod structural design provides a great deal of stability, triangulating the support structure at each corner of the furniture. The hairpin design of the legs accentuates the mid-century style, which is in the midst of a great resurgence in the world of interior design, as well as among furniture collectors and makers. These new, heavier-duty 3-Rod Hairpin Legs are the latest addition to the I-Semble product line offered at Rockler.

"I-Semble 3-Rod Hairpin Legs are our beefiest hairpin legs to date," says Steve Krohmer, Rockler's Vice President of Product Marketing. "While the hairpin design delivers the unmistakably sleek mid-century look, the extra support makes them very rigid, and the 28" height is ideal for dining tables and other furniture that can use the extra support."

The I-Semble 3-Rod Hairpin Legs are constructed of solid 1/2" rod steel. Each 3-rod leg is welded to an L-shaped mounting plate, offering six total mounting holes and measuring 4-3/4" on each side to ensure a strong interface with the table top. Each set of four legs includes 24 matching Phillips, pan-head mounting screws for easy assembly.

The I-Semble 3-Rod Hairpin Legs are sold in packs of four, available in two finishes: Stainless Steel (56278) which retails for \$199.99 per pack and Black (54474) which retails for \$119.99 per pack. They can be purchased at Rockler Woodworking and Hardware stores nationwide, Rockler independent resellers, Rockler.com, or from the Rockler catalog.
