

## **Full and Self-Service AED Medical Oversight & Program Management**

You've committed to making your organization heart safe by investing in AEDs, but your responsibility doesn't end there. The next step is to make sure that your AED program meets government requirements and is prepared to help rescuers save lives when an emergency happens.

EMC CPR & Safety Training can help you design, implement, and maintain a compliant [AED](#) program, whether your organization has one AED or one hundred. Our AED Program Management service is primarily used by the following organizations:

- Large corporations
- Small and medium-sized businesses
- Government agencies
- Military and law enforcement
- Schools and colleges
- Community organizations

Federal and several state regulations require AED/CPR instruction, AED maintenance, record keeping, and a licensed physician to oversee your AED program. Our comprehensive AED Program Management service is a complete source for all of these tasks.

## **AEDs (Automated External Defibrillators)**

As a leading distributor of AEDs, we provide access to all the highest rated and reliable defibrillators available in the marketplace. With your choice of [Cardiac Science](#), [Defibtech](#), [HeartSine](#), Philips, and [ZOLL](#), we will create a custom package to guarantee the best prices.

## **AED Selection**

Our AED specialists will help you select the unit that will best meet your needs and suit your environment. In addition, we help you develop your AED workplace program with determining the number of AEDs your facility should be equipped with to allow for optimized response time to cardiac arrest.

## **AED State Laws Experts**

Navigating through federal, and sometimes state, laws to be compliant with your AED can be difficult and overwhelming. Our AED experts will determine what steps you need to take to be in full compliance with your FDA-regulated AED device.

## **AED/CPR Training**

EMC CPR & Safety Training offers the highest standard in AED/[CPR](#) education as an American Heart Association-authorized provider, ESCI Education Center, and ASHI Training Center. As part of our AED Program Management service, we deliver on-site AED/CPR classes with a manikin ratio that never exceeds 3:1.

## **AED Maintenance and Record Keeping**

We will maintain your AEDs by having an AED technician perform recommended service inspections and replace any expired electrodes/batteries on a regularly scheduled basis. In addition, we'll keep records of certification dates, employee training, and test scores, as well as monitor program inventory, locations, serial numbers, and equipment maintenance.

## **Medical Prescription and Oversight**

EMC has aligned with Annuvia – a world leader in AED Management Programs to offer top-of-the-line services. Our alliance with Annuvia allows for nationwide AED medical direction and oversight services.

We'll provide AED prescription and medical oversight to ensure that your AED program is both compliant and medically sound. Our role is to provide medical leadership, offer guidance in

equipment selection and deployment, ensure appropriate training, and develop guidelines for responders, among other tasks.

### **Benefits of Our AED Program Management Service**

- Saves administrative time
- Makes record keeping easy
- Guarantees compliance
- Customized to your organization's needs
- Ensures that your AED program is fully prepared to save lives
- Alerts you when your equipment needs to be replaced or your staff needs retraining

Let us handle the legal and administrative details of your AED program, so you can feel confident knowing that your business is adhering to all of the necessary protocols. Our AED Program Management service is a sound investment that will decrease liability and increase compliance, all the while enhancing the effectiveness of your organization's AED program. Our service covers everything from medical oversight to maintenance issues, so you'll have a single point of contact overseeing all aspects of your AED program.
