

The Travel Adventure of PeakFinder by Fabio Soldati

Enabled for Intel® Atom™ Tablets for Android*

With budget and time constraints, visiting great landscapes of the world can be more difficult for the average person than ever before. With the resourceful, visually-stimulating app of PeakFinder, recently optimized for Android* tablets, users can now virtually experience the Alps just as if they were there in-person. With easy handling, smooth views, and an excellent interface, users can explore mountains as much as any mountaineer thanks to this educational application.

PeakFinder whisks players away to a different environment, where they can enjoy beautiful and breath-taking mountain views. The app includes 30,000 peak names, and provides maps for view point selection, covering the complete area of the Alps including Austria, Switzerland, France, Germany, Italy, and Slovenia. With fast rendering of the surrounding landscapes of up to 300km, users can even use digital binoculars to select less prominent peaks.

In addition to having the opportunity to view stunning scenery, players will also take part in a learning experience as they familiarize themselves with geography new to them. PeakFinder can provide adventure and educational fun to participants of all ages.

PeakFinder Experience Reaches a New Audience with Intel Atom tablets for Android*

Tablets provide fans of this app with the best in a 360° Panorama display of mountains. The high-resolution screen enhances the scenic views, and the portability of the device allows participation from anywhere. The latest optimization truly brings the incredible mountain peak views to life for users.

The app can now easily and quickly be downloaded, and users will appreciate the versatility and mobility offered with Intel® Atom™ tablets for Android*. PeakFinder presents enhancements and functions available only on high-performing platforms. With easy-to-use, convenient options, the mountain explorations can truly provide a virtual getaway.
